

Green Point

# Green Point for

Environmental Consulting, Systems & Services

---

Company Profile 2026

# Message from the chairman & CEO

**Green Point for Environmental Consulting, Systems & Services** was established in 2014. Accredited by the Egyptian Ministry of Environment, our firm has consistently supported public and private sector clients in identifying, managing, and mitigating their environmental risks, while ensuring compliance with applicable national regulations and internationally recognized environmental and social standards. Green Point provides technically robust, independent advisory services that support informed decision-making, regulatory approval.

In today's investment and regulatory environment, effective environmental management is a core component of operational resilience, risk governance, and long-term value creation. Green Point was founded to deliver technically sound, independent, and practical environmental advisory services that support informed decision-making and responsible development.

Our work is grounded in a strong understanding of Egyptian environmental legislation and regulatory processes, complemented by alignment with internationally recognized environmental and social frameworks, including IFC Performance Standards, EBRD Environmental and Social Policy, ISO 14001, ISO 14064, the GHG Protocol, and EU CBAM requirements, as applicable.

We support clients across industrial, healthcare, petroleum, tourism, and commercial sectors throughout the full project lifecycle—from assessment and permitting to compliance, monitoring, and corrective action implementation.

The firm's strength lies in its governance and technical leadership. Our management and senior technical teams are certified professionals with direct involvement in project execution, quality assurance, and regulatory coordination. This structure ensures accountability, consistency, and transparency across all assignments, while enabling effective management of environmental, health, and safety considerations.

As Chairman and Chief Executive Officer, I am personally committed to upholding the highest standards of professional integrity, technical rigor, and ethical conduct. We value long-term partnerships built on trust, performance, and measurable outcomes, and we remain dedicated to supporting sustainable, compliant, and responsible investment and development in Egypt.

As environmental, climate, and regulatory requirements continue to evolve, Green Point is strengthening its capabilities in sustainability, carbon management, and investment compliance advisory services. Thank you for your confidence in Green Point. We look forward to continuing our role as a trusted environmental advisory partner for institutions, investors, and project developers.

**Dr. Kamal Hussien**

Chairman & Chief Executive Officer

# Governance & Technical Leadership

**Green Point for Environmental Consulting, Systems & Services** is led by a management team with strong technical expertise, regulatory insight, and a proven track record in delivering environmental and sustainability solutions across multiple economic sectors in Egypt. The leadership team combines strategic oversight with hands-on project involvement, ensuring consistent quality, compliance, and risk-aware decision-making.

## **Dr. Kamal Hussien** **Chief Executive Officer & Chairman**

Dr. Kamal Hussien serves as Chief Executive Officer and Chairman of Green Point, bringing extensive experience in environmental consulting, environmental governance, and sustainability advisory services. He has led and overseen a wide portfolio of assignments including environmental impact assessments (EIA), environmental compliance audits, corrective action plans, and regulatory approvals for industrial, healthcare, petroleum, tourism, and commercial developments.

Dr. Kamal possesses in-depth knowledge of Egyptian environmental legislation and regulatory frameworks, complemented by alignment with international environmental and social best practices. Under his leadership, Green Point has established a reputation for technical rigor, regulatory reliability, and practical, implementable solutions that support clients in managing environmental risks, achieving compliance, and improving long-term operational performance.

## **Senior Management & Technical Leadership**

**Green Point's** senior management and technical leadership team consists of **certified environmental engineers and specialists accredited by the Ministry of Environment**. The team combines strong field-based technical expertise with strategic environmental and sustainability advisory capabilities, enabling effective support across the full project lifecycle—from assessment and permitting to compliance, corrective action implementation, and regulatory approval.

### **Key areas of expertise include:**

- Environmental Impact Assessment (EIA) and obtaining the environmental approval.
- Environmental compliance programs and corrective action plans (CAP).
- Environmental records, hazardous materials and hazardous waste registers, and regulatory management.
- Workplace and ambient environmental measurements and monitoring.
- Sustainability advisory, carbon footprint assessment, GHG inventories, and CBAM reporting.
- Resource Efficiency & Circular Production (RECP) auditing.
- Industrial Register, Operating License.

## **Governance, Quality, and Client Assurance**

The management team maintains direct oversight of project execution, quality control, and regulatory alignment. This governance structure ensures that all assignments are delivered in accordance with applicable Egyptian environmental regulations, sector-specific requirements, and internationally recognized environmental standards.

Green Point's leadership approach emphasizes transparency, technical accuracy, and long-term partnership, enabling clients to confidently manage environmental obligations while supporting sustainable growth and investment readiness.

## Our Vision

To support sustainable, compliant, and responsible development by enabling organizations to effectively manage environmental risks and regulatory obligations in line with national and international standards.

2024  
2025  
2026  
2027

## Our Mission

To deliver independent, technically sound environmental and sustainability advisory services that support regulatory compliance, risk management, and long-term operational performance.

## Our Commitment

We are committed to delivering comprehensive environmental consulting services that support risk identification, impact assessment, and regulatory compliance in accordance with Egyptian Environmental Law and the requirements of the Environmental Affairs Agency.

## Our History & Experience

- **Established:** 2014
- **Corporate Track Record:** Over 10 years of continuous environmental consulting and regulatory advisory services since establishment in 2014.
- **Team Expertise:** Core team brings over 20 years of collective technical and regulatory experience in environmental auditing, measurements, and reporting.
- **Clients Served (Past 4 Years):** 55 facilities successfully supported across industrial, healthcare, tourism, and commercial sectors.

## Our Goal

Our goal is to help you evaluate any potential risks to the environment. Our team of experts will work with you to assess the environmental impacts of your project, and design preventive measures to reduce or eliminate them

# Our Core Values

## Integrity:

We conduct our work with independence, transparency, and ethical responsibility, ensuring objective advice and professional accountability in all assignments.

## Community Engagement:

We are committed to fostering strong relationships within our community. We actively seek partnerships with local businesses and organizations to support initiatives that enhance the well-being of our community.

## High Performance:

Our track record is the practical expression of our commitment to professional ethics and operational excellence.

We continuously strive to enhance our performance and deliver services to the highest international standards

## Sustainability:

We believe in creating a positive impact on the environment by prioritizing sustainable practices in our operations and design. We strive to minimize waste, reduce energy consumption, and promote eco-friendly materials.

## Innovation:

We apply data-driven tools, modern measurement technologies, and evolving methodologies to deliver practical and forward-looking environmental solutions.

## Collaboration:

We believe that teamwork drives success. By fostering a collaborative environment, we encourage diverse perspectives and ideas that lead to exceptional outcomes for our clients and projects.

# Our Consulting Services

Our services are delivered through integrated consulting practices covering assessment, compliance, monitoring, and sustainability advisory.
