9) New Business

NB1 – Bob ve3iny – *“has there been any talk about allowing 25 MHZ split on 900 ? I know it's becoming quite common down your way, and if eventually allowed in Canada, would open up a great opportunity for utilization of the 900 band. Very difficult to find equipment to do a 12 split on 900. But Motorola GTX-900's and Sinclair LMR Reslocks are going for peanuts today, their very easy to find (radios 60 bucks, duplexers 100 bucks), and do a very nice 25 split.”*

NB2 – Echolink, use 144.900 – 145.100
