-Shrink Sleeve with super dense black and cold foil, ECL with release, PSA and laser expiration and lot coding, PFOA-free IML Coating.

UVitec Printing Ink, Inc. presents our UV/LED Flexographic & Rotary Screen Inks, Coatings & Adhesives uniquely formulated for Shrink Label Applications. Our line of products addresses common industry shortcomings for Shrink label production. It includes over printable and controlled COF high opacity white inks and variable gloss clears, scuff resistant mattes, high build gloss & matte tactile, soft touch & sandy textures, cold foil adhesives, glitters, pearlescence, and other specialties. All products are Benzophenone & PFOA free with options for REACH, Nestle and CA Prop 65 compliance. We also present a full line of industry best UV/LED PSA's and release coatings for ECL's and other constructions.

Specialists in:

- Shrink Sleeves and Pouches
- Prime Label & In-Mold Label
- Datalase® Laser Markable Inks
- Extended Content & IRC
- Customer Formulations
- Regulatory Compliance

UVitec has a growing stake providing coatings for the ever-competitive BEVERAGE MARKET. Our customers rely on us to provide high eye appeal aesthetics and tactile finishes that draw the consumer to their products. Test us to see how we can help drive new design concepts
