

The Computer in the Life of the Church
Course 9024 – Day 2
Outline

I. Identity Fraud Overview

- A. Intro to Identity Fraud
- B. Criminal Identity Theft
- C. Digital Identity Theft
- D. Identity Theft Insurance
- E. IdentityTheft.Gov
- F. Seniors Identity Theft
- G. Medical Identity Theft
- H. Synthetic Identity Theft

II. Worship Presentation Tools

- A. Easy Worship
- B. Canva – Curated Email Templates

III. AI – Artificial Intelligence

- A. Simple Examples of AI
 - 1. Voice Recognition – Asking Google or Siri to do something
 - 2. Using Search Engines – Google, Bing, Safari, etc.
 - 3. Spam filters use AI to deliver spam to one's In-Box
 - 4. Self-driving cars use AI like Waymo
 - 5. AI Safety

The Computer in the Life of the Church

Course 9024 – Day 2

Outline

B. AI News

1. Feedly – www.feedly.com
2. Google News - www.news.google.com
3. Science Daily – www.sciencedaily.com – go to AI section
4. AI News – www.artificialintelligence-news.com
5. AI Framework – www.tensorflow.org

C. AI – Intelligent (Computer) Machines

1. Artificial Intelligence – learning phase – Google Search Engine
2. Machine Learning is not enough
3. Deep Learning – Use of huge data sets and Algorithms

D. AI Shortfalls

1. Not enough data or data sets
2. AI, like self-driving cars, needs years of data
3. Latency – slow reaction or delay

E. AI Demo - Videos

1. Dynamic Drive-Thru Powered by SoundHound AI
2. Voice 2.0 Live Demo | Deakon Dialogues '25
3. Deep Mind Research Alphago

F. Conclusion

1. Summary or overview
2. Questions and Answers
