

# New CompTIA Costs & How WCS2 Helps You Save

## Important Update: CompTIA Exam & Learning Product Pricing

As your **official CompTIA Academic Partner**, the **Women Cybersecurity Society (WCS2)** is committed to keeping you informed about critical updates affecting your learning and cybersecurity certification journey.

In **June 2025**, CompTIA introduced a **price increase** across **exam vouchers** and a wide range of **learning products** (training materials, guides, etc.). This change affects many CompTIA certifications.

For example, the **retail price** of a **CompTIA Security+ exam voucher** has increased from \$404 USD to **\$425.00 USD**. We encourage all students and professionals to **factor these updated prices into your future training and certification planning**.

We remain dedicated to supporting your **educational and professional goals** in cybersecurity and helping you navigate these changes with confidence.

## Exclusive Discount for Our Community

As authorized academic partners, **WCS2 offers a base discount of 25% off the listed retail price** on CompTIA products to our students and community.

Additionally, **WCS2 Pro members and scholarship winners** receive an **extra 5% discount**, for a **total of 30% off** retail.

That means when you purchase your exam voucher or learning resource through us, you benefit from significant savings, even after CompTIA's price adjustment.

## What You Should Do Next

- **Review your certification goals:** Adjust your timeline and financial plan based on the new pricing.
- **Explore your options:** Compare study paths, bundles, and learning resource combinations to maximize value.
- **Connect with us:** If you need help understanding which products make the most sense or how the discounts apply, **contact our team** — we're here to help.

**Note:** *In this announcement, "voucher" refers to a **CompTIA certification exam voucher**.*

The Women CyberSecurity Society remain dedicated to empowering your educational and professional journey in cybersecurity — and to making certification more accessible through our partnership.
