

Marketing / Press Release for 2019 FAST Award

The *FAST (Females Advancing In Security & Technology) Award* is the highest and most prestigious award offered by the *Women Cybersecurity Society (WCS2)* and is presented to women who demonstrate commitment to not only advancing both their individual professional security careers, but also to moving forward the field of cybersecurity and technology as a whole. These individuals have exhibited noteworthy growth and perseverance in their cybersecurity and technology career efforts over the past year and a half. Our 2019 recipients have displayed an ongoing commitment to the development of the security and technology field by exhibiting both unwavering passion and valuable leadership.

Though it has been a challenging year across our industry, these women have remained steadfast in their dedication to advancing within their respective fields and professions.

It is the great honor of the **Women Cybersecurity Society** to present the **2019 Females Advancing in Security and Technology (FAST)** award to the following recipients.

♥️ ✨ **Julia Boswell** ✨ ♥️
♥️ ✨ **Anahita Mathlobi** ✨ ♥️

These individuals will be publicly recognized on the Women Cybersecurity Society website for the next twelve months and during an award ceremony early in 2021. We are proud to endorse them as female heroes in the field of security and technology!

The Women Cybersecurity Society Board of Directors and Advisory Board encourages all members to submit nominations of 2020-2021 FAST award recipients. Individuals are eligible for this recognition if they meet 3-5 of our professional criteria, if they are a student or WCS2 member, a Canadian resident, are 18+ years of age, identify as a female, are enrolled in a learning program and can provide evidence of ongoing career advancement.

Please join the Women Cybersecurity Society in congratulating these recipients!

The WCS2 Board of Directors and Advisory Board
