Glass Solutions

INSPIRE | ENVISION | DESIGN | BUILD

INSPIRE ENVISION DESIGN BUILD

A leader in architectural glass fabrication and supply by offering turn-key glass solutions. Our primary focus is serving clients who's projects require high volume glass products and bespoke custom one-off pieces within the hospitality, commercial, and manufacturing industries.

Explore FGD Glass Solutions and discover how we strive to inspire, envision, design, and build.

Based out of Atlanta GA, for over 30 years FGD Glass Solutions has been a leader in glass manufacturing, fabrication and supply. Offering turnkey glass services with products such as glass showers, barn-doors, decorative glass, tabletops, mirrors, and whiteboards. FGD Glass Solutions has dedicated itself on ensuring our client's projects are completed on time and on-budget exactly as planned. We specialize in projects requiring highly custom one-off pieces to high volume projects in hospitality and commercial to furniture and manufacturing. Thanks to our decades in the glass industry, our project assistance takes you through budget quotes to installation. We help our clients avoid project and budget pitfalls, ensuring your glass meets code, and offer suggestions on the best ways to produce your architectural glass products using our variety of services and products.

We offer more than simply generating quotes and supplying products. We help elevate designs, offer turnkey products and services, and help our clients avoid issues by diving into your project and becoming a part of your team.

Explore FGD Glass Solutions and discover how we strive to inspire, envision, design, and build.

DECORATIVE GLASS TYPES

- Antique Mirrors
- Tinted Mirrors
- Satin Mirrors
- VitraStone
- Etched Glass
- Textured Glass
- Laminated Glass
- Back Painted Glass
- Moire Glass
- Glass Film
- Digitally Printed Glass

GLASS TYPES

- Standard Clear & Low Iron
- Tempered & Plate Glass
- Standard & Antique Mirrors

DECORATIVE GLASS

DECORATIVE GLASS

FGD Glass Solutions is a proud leader in decorative glass, with an extensive line of services and products. We offer a range of exclusive patterns and designs and custom options that allow you the freedom to create any design and effect for your project. Browse our decorative glass library and explore our vast collections from antique mirrors to frosted and etched patterns.

About Our Decorative Glass

With a wide range of decorative glass collections, you'll be sure to find the designs and features that you're looking for. Each of our collections are completely customizable and offer you the ability to customize patterns, colors, gradients, and opacities to achieve your design vision. You can even supply your own custom designs to apply directly to glass using any decorative glass technique.

Our decorative glass library features colorful Decorlite back-painted glass and Vivicolor laminated glass, as well as Couture fabric, Etama wood, and VitraStone laminated glass patterns. We offer many mirror options, including satin etched mirrors and antique mirrors too. Also, our glass vinyl films are perfect for enhancing a currently existing space where new glass or permanent alterations isn't an option.

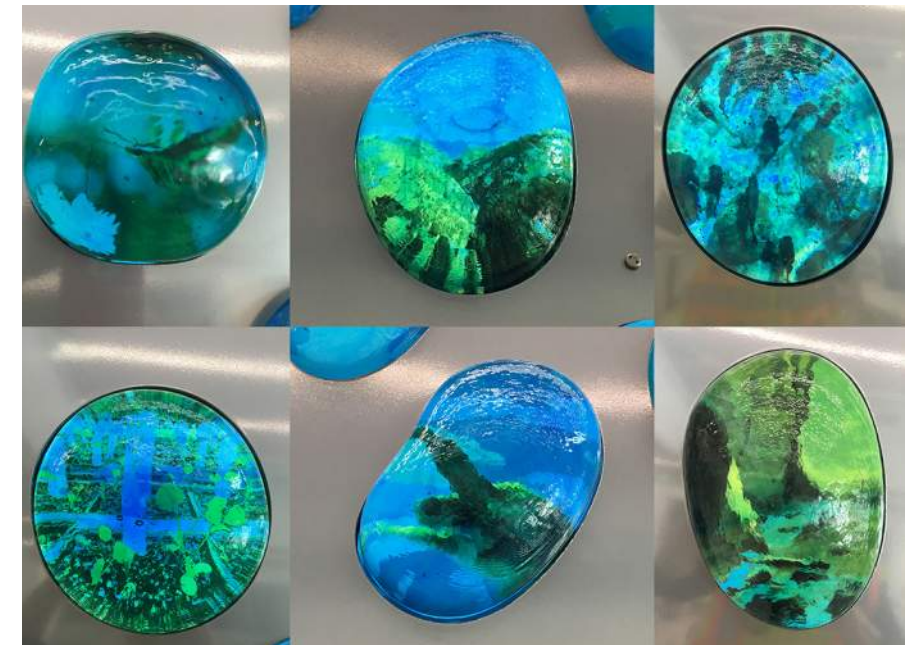

Our etched glass collection features a wide range of options and patterns perfect for walls and partitions. Go an extra step and light up your etched glass panel with our LED edge lit glass option.

Lastly, our large line of exclusive glass patterns offers you something unique that you won't find elsewhere.

Please Check our website for the most up-to-date decorative glass patterns and offerings.

Decorative Glass Overview

- Complete control over every aspect from opacity to scale to color
- Extensive decorative glass collections and patterns
- Exclusive patterns and designs not found anywhere else
- Go custom with your own artwork and ideas
- All patterns can be applied using any decorative glass technique

ANTIQUE MIRRORS

ANTIQUE MIRRORS

Introduce Luxe & Sophistication With Antique Mirrors

Our antique mirror colors range from calm and subdued to bold and bright and our antique mirror patterns are perfect for any environment with our minimal to high contrast designs. From dark silvers and grays to golds and purples and from slight hazes to bold, cloudy designs, in any shape up to 72" x 96" in size, our antique mirrors are a perfect statement or accessory to any room. All of our antique mirrors are offered in a number of solutions such as wall cladding, barn doors, back splashes, tabletops, or cut to your size for framing.

Beyond standard cut sizes, we now offer antique mirror cases (24 sheets), stock sheets, half cases (12 sheets), and mixed half cases for our glass company clients.

Antique Mirrors Overview

- A wide range of styles from cool and calm to colorful and bold
- Antique mirror sample kit available
- Many package options for glass companies
- 1/4" thickness on all antique mirrors
- Other thicknesses available by request
- Sizes up to 72" x 96"

TINTED MIRRORS

TINTED MIRRORS

Tinted mirrors offer function and an eye-catching focal point. Offering the same benefits of a mirror such as daylighting and expanding the feel of a space, but also with a tint for adding a pop of color and dramatic visuals in any design.

Offered in sizes up to 84 x 144" you can go floor to ceiling in your designs. We also offer custom shapes with our glass cutting service. We also offer a range of bevels if your design needs exposed edges.

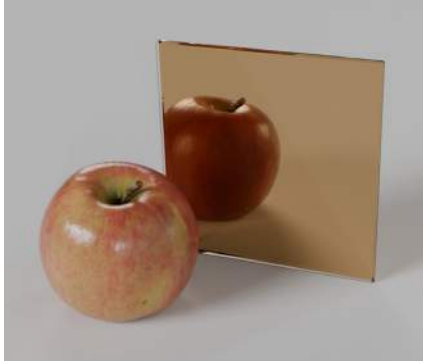

Our tinted mirrors are offered in standard clear or low-iron glass panels. You can also choose between laminated, monolithic, safety backed, or tempered glass designs.

If you need even more color, you can go laminated and have access to our whole Vivicolor line of laminated glass colors or mix and match interlayers for a complete custom color of your choosing.

Tinted Mirrors Features

- Custom colors available
- Various edge bevels
- Custom cut shapes and sizes
- Laminated, Monolithic, Safety Backed, or Tempered glass
- Up to 84" x 144"
- 3/16 and 1/4" thicknesses

NOTE Appearance, color and reflection may vary due to lighting, angle and environment. Request sample prior to ordering.

SATIN MIRRORS

Satin Mirror

Our satin acid etched mirrors offer a modern subdued reflectivity and softer light reflection. We offer a range of sophisticated acid etched tinted mirrors or choose from our laminated satin mirrors blending acid etched glass and mirror with our ViViColor films. Our acid etched satin mirrors offer a wide range of colors from an eye catching pop of color to softer hues.

Our range of monolithic satin mirrors are a single piece of acid etched tinted mirror with colors such as bronze, clear, and grey.

Laminated satin mirrors feature a standard mirror laminated to an acid etched piece of glass with a ViViColor film sandwiched in between. Pairing our satin mirrors with ViViColor allows for a much wider range of colors for satin mirrors than you'll find anywhere else.

Satin Mirror Features

- Monolithic dimensions – up to 92" x 126" x 1/4"
- Laminated dimensions – up to 82" x 121" x 3/8" to 1 1/2"
- Large library of satin mirror colors
- Mix and match with other decorative glass options such as infilling, printing and custom etched patterns.
- Perfect for lobbies, elevator surrounds, tabletops, counters, backsplashes, and more.

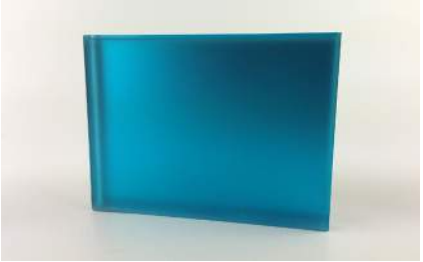

Monolithic Gray

Monolithic Bronze

Monolithic Clear

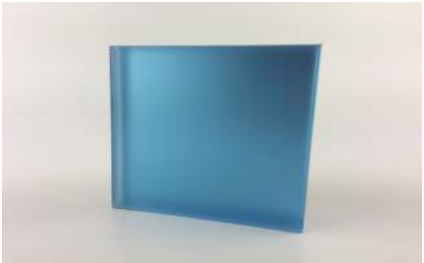

Steel Blue

Pale Lavender

Chrome Orange

Satin Blue

Satin Yellow

Lilac Satin

Satin Cosmetic Emerald

Satin Mirrors are a sophisticated blend of acid etched glass, ViviColor, and mirror backing. This mix offers a subtle light diffusion and subdued color pop. Perfect for a focal point or something that demands less attention.

ENVIRONMENTS Hotels, Offices , Hospitals, Commercial, Restaurants, Education Facilities, Museums

APPLICATIONS Partitions, Barn Doors, Wall Cladding, Signage, Decorative Features, Exhibits, Store Fronts, Curtain Wall

SUSTAINABILITY As part of the overall design FGD Glass Solutions ViviColor provides day-lighting and views while maintaining thermal comfort, optimizing energy performance, and reducing light pollution. For more information on how ViviColor can contribute LEED credits, please contact us at 770-614-4121.

MAX DIMENSIONS 96” x 130” Depending on Glass Type

STANDARD THICKNESS 3/8” - 1 1/2”

GLASS TYPES Acid etched with standard mirror

SAFETY OPTIONS Heat Strengthened, Tempered, Laminated

CUSTOMIZATION Visit FGDglass.com or contact us at 770-614-4121 or Sales@FGDglass.com to learn more about customization options.

TEXTURED GLASS

TEXTURED GLASS

Add visual interest and privacy while maintaining light transfer with textured patterned glass

Textured pattern glass offers unique designs and visual interest while offering privacy and light transfer. Textured glass is created by passing semi-molten glass between metal rollers that have a pattern cut into them. This process imprints the pattern into the glass.

One of the oldest forms of glass and textured glass is durable, easy to clean, and scratch and fingerprint resistant. Pattern glass offers many opportunities to create visual interest in a space with various levels of privacy.

Depending on the pattern, textured glass allows you to add visual interest in your space while still offering privacy and light transmission. This makes it ideal for partitions, furniture inserts, shower doors, and barn doors.

Another great feature with textured patterned glass is the ability to pair with other decorative glass services. Backpaint, laminated, mirror back, among other services are all available with patterned glass. This extends the capabilities of textured glass to help you achieve your design vision. In some cases, this also helps you meet construction code, such as safety backed and laminated patterned glass.

Textured Glass Features

- Lamination, Tempering and Safety Backing
- Cut To Size
- Hole Drilling & Cutouts
- Polished Edges
- Compatible with decorative glass options
- Sheet sizes and thicknesses subject to change
- Patterns subject to availability

MOIRE GLASS

MOIRE GLASS

Moving Art with Moire Patterned Glass

Our Moire patterns were hand crafted and designed in-house by our art department and can't be found anywhere else. After months of designing and creating each pattern, we tested to ensure our patterns were pleasing in effect and on the eyes. Moire patterns can get out of hand fast and cause disorientation and headaches, so we went to great lengths to ensure our patterns enhance a space and add a amazing focal point.

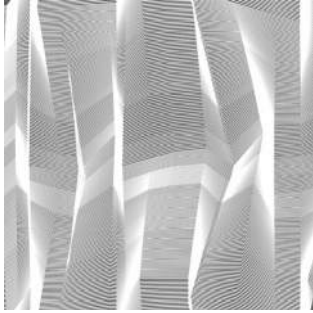

About Moire Patterned Glass

The term moire originates from a type of silk textile that has a rippled appearance. Pressing two layers of these textiles when wet would create imperfect spacing in the threads and create a moire pattern that remained after the fabric dried.

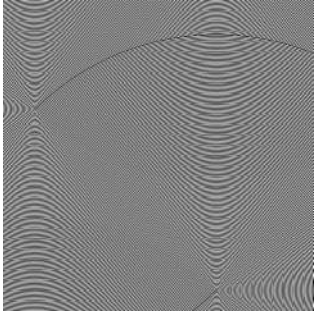

Our moire patterned glass gets it's movement by you, the viewer. Simply walking or moving by the glass will cause the moire animated effect to appear. By mixing various glass fabrication techniques, we have achieved various patterns that offer a moire effect as you move by the glass panels. Perfect for hallways, as distraction bands, elevator cab doors, glass railings, and more.

Moire Glass Features

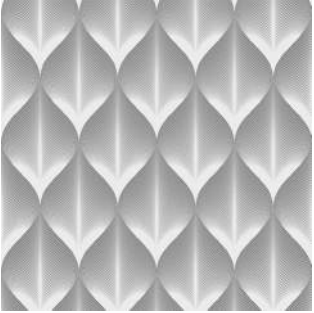

- Fabrication sizes up to 82" x 121"
- Thicknesses from 1/4" to 1 1/2"
- Low-iron or standard glass types
- Laminated, Monolithic, Safety Backed, or Tempered glass

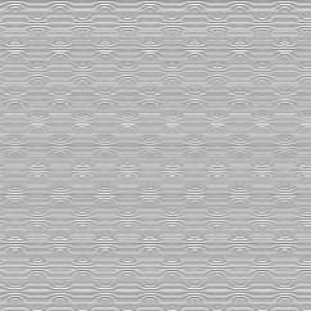

Crumpled

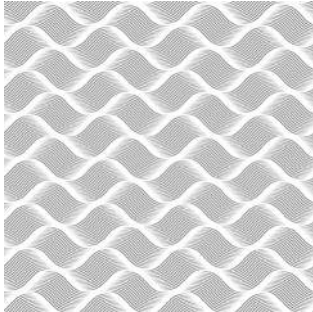

Eclipse

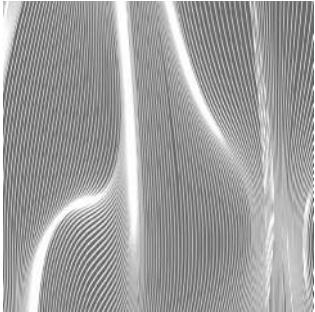

Fold

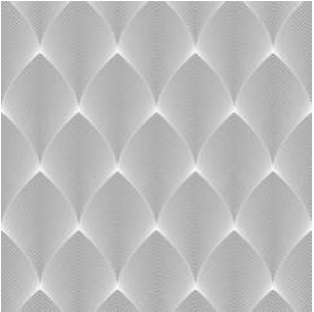

Mole Hill

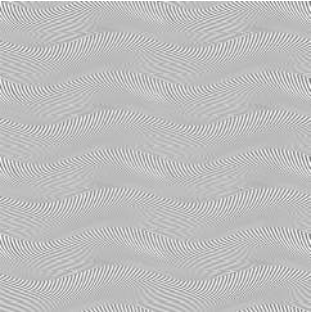

Ribbons

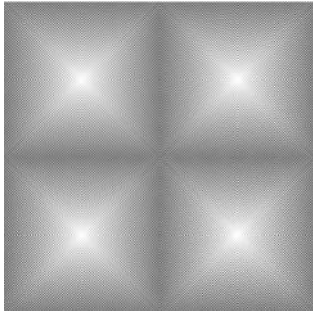

Satin

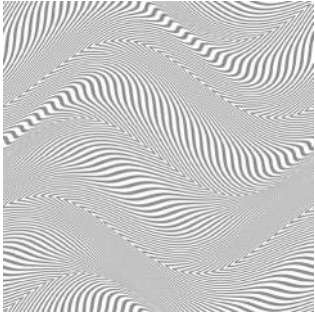

Scaled

Slither

Square Burst

Wrinkled

Often seen in art, on computer screens, and in photography, moire patterns are usually avoided due being disruptive. But embracing the chaos yields surprisingly artistic results and with experimentation can be controlled offering subtle, and interesting patterns. You can even plan moire outcomes such as text, shapes, and patterns.

ENVIRONMENTS Hotels, Offices , Hospitals, Commercial, Restaurants, Education Facilities, Museums

APPLICATIONS Partitions, Barn Doors, Wall Cladding, Signage, Decorative Features, Exhibits, Store Fronts, Curtain Wall, and Table Tops

MAX DIMENSIONS 82” x 121

GLASS TYPES Low Iron & Standard Clear

SAFETY OPTIONS Laminated, Tempered, & Safety Backed

CUSTOMIZATION Visit FGDglass.com or contact us at 770-614-4121 or Sales@FGDglass.com to learn more about customization options.

ETCHED GLASS

ETCHED GLASS

Etched glass is one of the premiere decorative glass options. Used for decades, etched glass offers unlimited possibilities while retaining a classic, clean look, allowing light transmission, and providing privacy. Select from full frosted panels, privacy bands, or any of our frosted etched glass patterns. For a complete custom look, you can even provide your own designs to be etched or carved into glass.

Etched glass is used on a variety of areas from walls and partitions, to glass doors, cladding, glass shower doors, lighted mirrors, and even glass tabletops. You can get creative with etched glass by choosing glass patterns, words, gradients or full frosted panels. Full frosted glass panels offer total privacy white still allowing light transmission, where as shapes, patterns, and gradients allow you to continue your design ideas across glass. Incorporate branding, wayfinding, or shapes found throughout your environment directly to glass. Any of our decorative glass patterns or your supplied vector art or text can be etched onto glass. Scale, rotate, and adjust patterns to fit your design. If needed, our in-house art department can take your sketches and ideas and get them ready for you.

Etched glass is offered in various opacities and gradients perfect for projects that require privacy and style. Mix and match etched glass with other decorative glass such as back painted glass, laminated glass and printed glass.

Carved Glass

Take etched glass a step further with carving, a deeper etch, to create a 3d relief. Carving can be further enhanced by back-painting, LED edge lighting, or in-filling with any of our Decorlite colors.

Etched Glass Overview

- Carve the glass panel with deeper etching for 3D relief patterns
- Full size gradient fades and patterns for full opacity to complete translucency
- Compatible with other services such as LED edge lighting, back-painting, lamination, and printing
- Etch text and designs
- Etch glass panels up to 72" x 144"
- Etch transparencies from 10% – 100%

GLASS FILM

GLASS FILM

Achieve that etched glass look and feel, or go with something truly unique with a full sized color work of art. Anything you can imagine, we can make a vinyl film for it. Direct image printing, custom cut-outs, etched patterns and styles, text, and more.

Glass vinyl film is perfect not only for partitions and dividers, but also glass doors, windows, and tabletops.

Glass vinyl film is easy to install, will not damage the glass it's applied to and has the same selections of patterns and features that our other glass services offer, all for a fraction of the cost.

Our frosted vinyl films look like etched glass. They even refract light the same. But as opposed to etched glass, you can remove the vinyl film later without permanently damaging your glass panels.

ImageVue Decorative Glass Vinyl Film

ImageVue decorative glass vinyl films allow you to have full color, hi-resolution images printed to film ready to be applied to any glass surface. We even offer full color vinyl films for daylighting and custom plotted vinyl films offering various patterns and shapes from our library or from your art department. Beyond just selecting patterns from our library or supplying your own, we also offer you the ability to scale, rotate, mirror, and change the colors. ImageVue vinyl films allow you to make the ultimate custom vinyl film.

Glass Film Overview

- Easy to install and will cause no damage to the glass
- Full size gradient fades and patterns for full opacity to complete translucency
- Compatible with other services such as LED edge lighting, back-painting, lamination, and printing
- Custom patterns such as text and designs
- Can be applied to glass panels up to 72" x 144" in size
- Vinyl Film transparencies from 10% – 100%

PRINTED GLASS

PRINTED GLASS

Print in high definition direct to glass with our ImageVue Printed Glass Printing option. With full color spectrum up to 1200 DPI, we can print truly vibrant images and designs onto glass up to 82" x 121". Choose printed glass for light enhancing imaged windows or privacy partitions. Perfect for barn doors, glass shower doors, and glass tabletops. Choose between different levels of opacity and density to achieve the perfect effect. Printed glass is a true example of functioning art.

Our ImageVue Glass Printing service allows you to submit your own artwork or use any of our designs from our decorative glass library. Scale, rotate, change colors, and add effects to the patterns and print direct to glass creating a unique piece for your project. For a deeper level of creativity, mix with our other glass services like etched glass, back painting, and LED lighting.

Printed Glass Overview

- Print any picture, pattern, or design
- Pixel perfect gradients and shading
- Up to 1200 DPI print quality
- Mix with other services like glass etching, lamination, and back-painting
- Print panels up to 82" x 121"
- Full Color Spectrum

DECORLITE BACK PAINTED GLASS

DECORLITE BACK PAINTED GLASS

Decorlite back painted glass collection encompasses over 2,300 colors and is created in house allowing perfect color matching, consistency, and short lead times.

The Decorlite Back Painted glass range is made up of transparent, lacquered, colored, and metallic monocomponent and bicomponent water-based paints that make it possible to achieve high-quality aesthetic results with an array of effects and colors.

Mix our Decorlite Back Painted Glass with other decorative glass such as; etched glass, glass printing, and laminated glass.

Decorlite Back Painted Glass is a great addition to any architectural glass product such as glass tabletops, barn doors, partitions, and walls.

Environmentally Sound

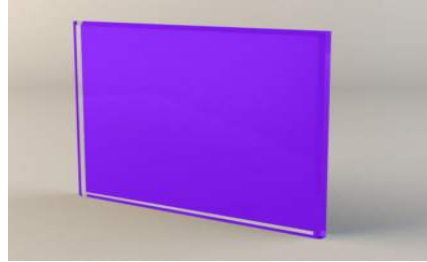

Our Decorlite back painted glass has been geared towards reduction in environmental impact. Due to it's low levels of volatile organic compounds (low VOC), Decorlite back painted glass is within compliance with the regulations on the limitations of solvent emissions into the atmosphere.

Our back painted glass is also non-flammable and will dilute in water furthering it's ability to perform environmentally.

Decorlite Back Painted Glass Overview

- Non-flammable, water based, low VOC paints
- Bacteria resistant making it perfect for hospitals, offices, and lobbies
- Compatible with other services such as etching, lamination, and printing
- Fabrication sizes up to 72" x 144"
- Larger Custom Sizes Available
- Over 2300 Library Colors
- Custom color matching option available

LAMINATED GLASS

LAMINATED GLASS

We offer a huge selection of laminated glass colors in our ViviColor line, stone textures with VitraStone collection, natural fiber interlayers such as wood in the Etama line, and finally our fabric interlayer line called Couture.

All of our laminated glass collections are created in-house from start to finish allowing us to offer amazing turn-around times and greater control reducing errors and ensuring we help you hit deadlines and beat project budgets.

Laminated glass is more than safety glass. It can also be beautiful. Add decorative laminated glass to your barn doors, showers, cladding, partitions, and walls.

Fully Customizable

If you do not see something that fits your project perfectly, we can work together and create a custom interlayer. Using our full-color ImageVue printing services, we can create any interlayer utilizing vector graphics, photographs, or any other image. Utilize our frosted interlayers to die-cut frosted patterns or even mix and match interlayers and laminated glass collections for a total custom look.

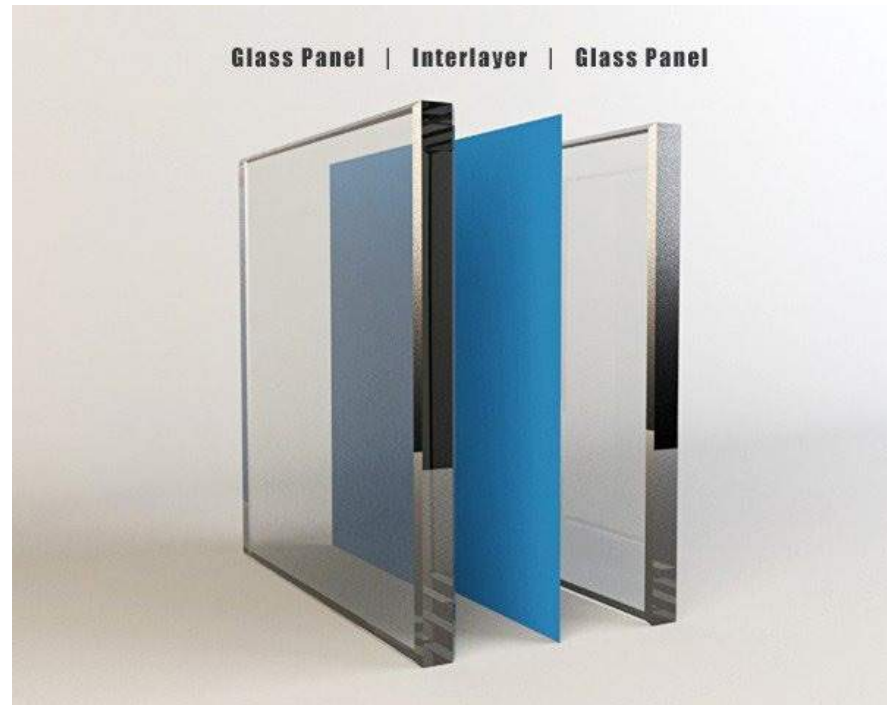

Our decorative laminated glass lines gives you full control from pattern, color, material, and even transparency. Add a frosted interlayer on top of your decorative interlayer to add privacy, control sightlines and still retain daylighting. Our frosted interlayers look and behave just like etched glass. Choose any level of opacity. We even offer frosted gradients.

In addition to having full control of what is in between the glass panels, you also have control of what is on the glass panels. Add etched glass patterns or include back painted glass to add shadows and depth. Light up your panels with our LED edge lit glass or use our antique mirrors or standard mirrors on the back side of your laminated panel.

Laminated Glass Overview

- Interlayer transparencies from 10% – 100%
- Full size gradient fades and patterns for full opacity to complete translucency
- Custom printed interlayers for unique designs and patterns based on your artwork
- Compatible with other decorative services like etching and back-painting
- Utilize daylighting and UV resistance to earn LEED points
- Fabrication sizes vary depending on interlayer selection. Max size is 100" x 144" x 1.5"
- 6 decorative laminated glass lines including exclusive in-house designed patterns

What Is Laminated Glass

In short, laminated glass is two or more panels of glass affixed together with an adhesive interlayer and sometimes also a decorative interlayer in-between each panel.

The panels are baked at a low temperature to activate the adhesive. Literally anything that is relatively thin and will not make the glass bow can be laminated, from grass and leaves to prints, papers, and fabrics.

Laminated glass panels can range in sizes all the way up to 100" x 144".

Since glass laminates are within two panels of glass, this leaves the front and back of the piece clean meaning you can add other decorative glass services such as etching, back-painting, or printing.

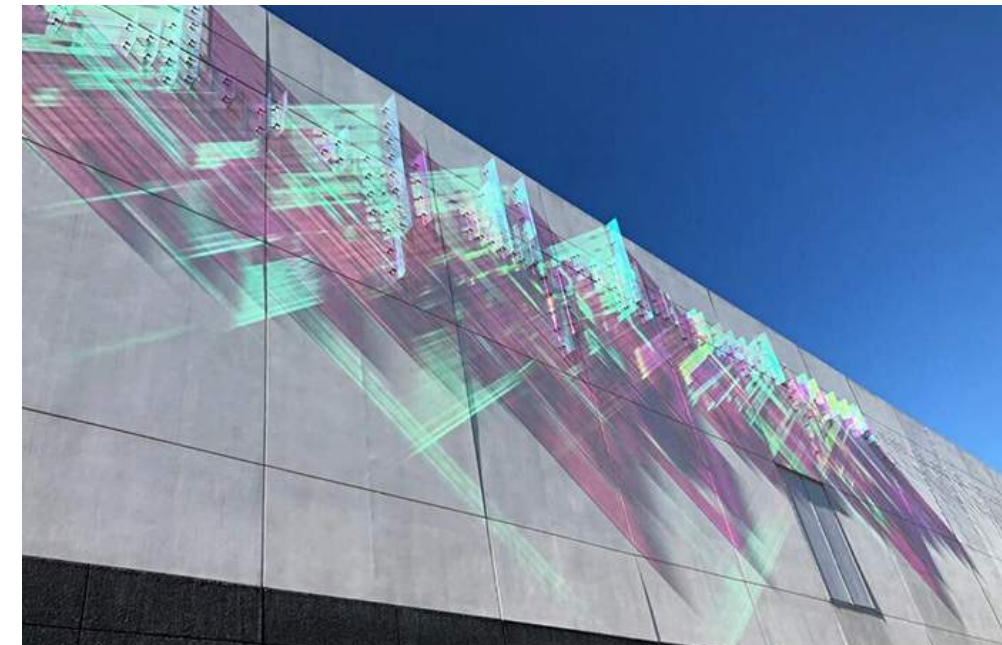

Laminated Glass and the Environment

Laminated glass offers solar energy control. When using daylight in your environment, too much can create a lot of heat. Control daylighting with our laminated glass to reduce energy usage. This also can contribute to LEED certification within your building.

Laminated glass also acts as a sound barrier due to its inherent sound absorbing properties. This makes it a perfect option for glass walls and partitions where privacy and sound control is a top priority.

Lastly, laminated glass offers UV control reducing deterioration and fading within your environment. The interlayers used in laminated glass can filter out almost all damaging UV rays.

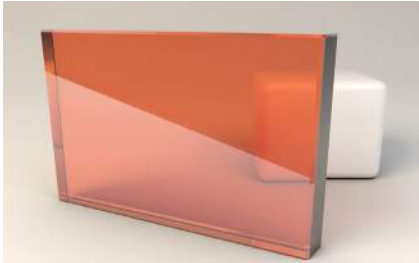

ViviColor

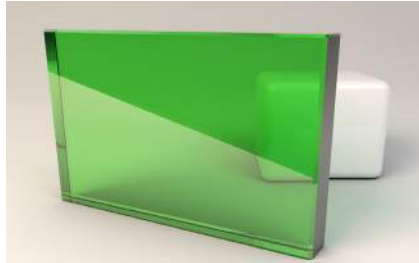

Introduce color and daylighting with ViviColor laminated glass. By incorporating Vivicolor laminated glass, you gain the ability to control daylighting and even gain LEED points. ViviColor laminated glass is offered in a myriad of colors and transparencies along with thousands of custom color options. You also have the choice of opacity levels with our frosted interlayers.

Couture

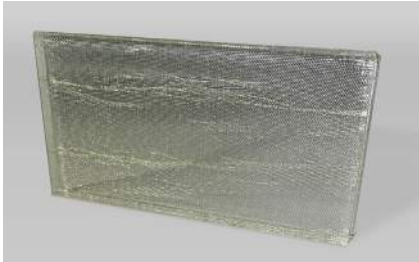

Class, style, and delicacy is what the Couture collection brings to any environment. Semi-transparent cloth patterns are laminated in glass allowing a decorative aspect while still allowing sight lines and light transfer. If privacy is what you need, Couture can also be paired with our opaque laminated films.

Couture Laminated Glass can be specified in a variety of fabricated forms such as: etched, tempered, safety backed, mirror backed, or with various types of edgework. Fabricated with a water resistant EVA interlayer, Custom frosted interlayers can be added to adjust the opacity of the final product. Conforms to Safety Glass Standards ANSI Z97.1, ASTM C1172, CSPC16 CFR1201

ENVIRONMENTS Hotels, Offices, Hospitals, Commercial, Restaurants, Education Facilities, Museums

APPLICATIONS Partitions, Barn Doors, Wall Cladding, Signage, Decorative Features, Exhibits, Store Fronts, Curtain Wall

SUSTAINABILITY As part of the overall design, Couture provides day-lighting and views while maintaining thermal comfort, optimizing energy performance, and reducing light pollution. For more information on how Couture can contribute LEED credits, please contact us at 770-614-4121.

MAX DIMENSIONS 72" x 120" Depending on Glass Type and Fabric

STANDARD THICKNESS 3/8" - 1 1/2" Custom thickness by quotation

GLASS TYPES Standard Clear, Low Iron, Acid Etched, Bronze Mirror, Grey Mirror, Low Iron Mirror, Standard Mirror, Acid Etched Mirror (Tempered or Annealed for all glass options except mirror)

SAFETY OPTIONS Heat Strengthened, Tempered, Laminated

CUSTOMIZATION Visit FGDglass.com or contact us at 770-614-4121 or Sales@FGDglass.com to learn more about customization options.

VITRASTONE

VitraStone

VitraStone is one of our premier decorative glass products featuring stone designs ranging from neutral color tones to bold colorful striations. The stone patterns add a posh characteristic and stunning visual focal point to any environment.

Our VitraStone designs can either be printed direct to glass or laminated. We also offer large formats for these services. For our printed glass we offer sizes up to 82" x 121".

If you're interested in adding VitraStone to your project, please contact us today with your project specifics. We will send you samples and work with you to ensure the final product fits your design needs.

VitraStone Features

- Print fabrication sizes up to 82" x 121"
- Laminated fabrication sizes up to 100" x 144"
- Pairs with other glass systems like LumaWall
- 27 stone designs to choose from
- Allows some light transmission
- Pair with other decorative glass services like etching, back painting, and printing.

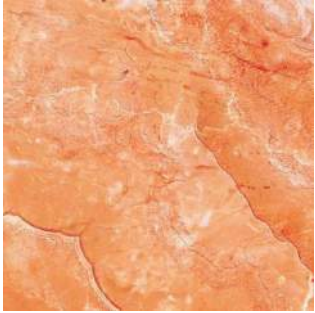

VitraStone + LumaWalls

VitraStone also pairs with our LumaWall illuminated glass wall panel system. For stunning results, light up your VitraStone glass panels. Perfect for full wall coverage, elevator surrounds, pillars, and so much more.

EXCLUSIVE GLASS PATTERNS

Exclusive Decorative Glass Patterns

By taking input from the design community, our in-house designers, and months of testing, we are proud to present our Exclusive Decorative Glass Patterns Library.

This ever expanding collection of patterns and designs is created completely in house and not available anywhere else. These designs are available from etch, lamination, print, and film glass services. You can also apply any of these designs to our architectural glass products such as; glass shower doors, barn doors, glass table tops, and lighted mirrors.

All of our exclusive glass patterns benefit from our fully custom options. Adjust scale, color, rotation and opacity to integrate our decorative glass seamlessly into your projects.

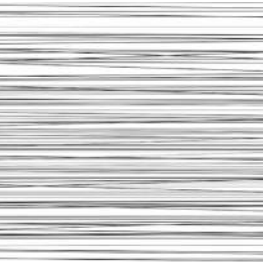

Exclusive Glass Patterns Overview

- Exclusive patterns you won't find anywhere else
- Adjust patterns' scale, rotation, color, and more
- Apply patterns to glass with print, etch, lamination, and more
- New patterns arriving often

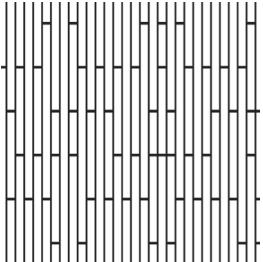

Exclusive Glass Patterns

From sleek and sophisticated to elegant and subdued, our expertly in-house designed patterns are crafted to enhance any environment. Explore our library and discover oversized patterns that make a bold statement to small screen designs for privacy and style. All of our patterns are engineered to be used with any of our decorative glass services meaning that they can be applied by film, print, etching, or lamination. You also have the choice of applying patterns to any glass type from standard clear to textured.

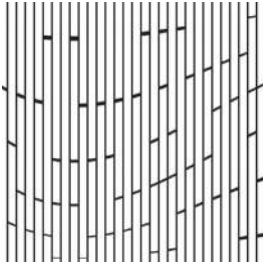

In addition to applying our patterns with any of our decorative glass options, you also have total freedom to adjust the pattern to your liking. From scale to rotation and even colors and gradients.

Request your sample kit now for your library and we'll ship it out immediately.

What You Can Expect In Your Sample Kit

- Etched Glass Patterns
- Colorful Back-Painted Samples
- Laminated Wood, Cloth, Film, Stone & Color Films
- Printed Images and Graphics
- Glass Films
- Antique Mirrors
- Gradients
- Glass Whiteboards
- Products and Decorative Glass Brochures

GLASS SIGNS

GLASS SIGNS

Extend your brand, wayfinding or message across a glass backdrop, perfect for room numbers, theater houses, along with bathroom and exit signs. For institutions, glass signs are a great way to show off a list of donors, inductees, and other lists of recognition.

Our glass signs are crafted in-house to your specs and design needs including custom **direct-to-glass printing**, **colorful in-filling**, **glass vinyl film**, and **etched glass**. To finish it off, light up your glass sign with our LED edge lit glass option. Add a strong focus point to your brand or message when you illuminate your sign in thousands of colors and lighting patterns all controlled from a wireless remote.

Glass Sign Features

- 1/8" - 3/4" thickness
- Etch, carve, in-fill, print, and film options
- Various mounting hardware styles and finishes
- Clear, Low-Iron, & Tinted in Annealed, Tempered and Laminated Options
- Custom Shape Options Available
- Light up your sign with LED edge lighting

LED EDGE LIT GLASS

LED EDGE LIT GLASS

LED Edge Lit Glass allows you to light up your etched or carved panel or glass sign and add an alternate light source to your space. Our custom engineered LED extrusions also allow for various colors and lighting patterns such as a fixed color of your choice, animated rainbow gradient, breathing on/off effect, and more. Control everything easily with the wireless controller. Change colors and lighting animations on the fly. Simply turn on and off displays from a distance. No more hassle with cables or reaching for switches.

Any of our decorative glass patterns or your supplied vector art or text can be etched or carved onto glass. We even have an in-house art department that can take your sketches and ideas and get them ready for you.

LED Edge Lit glass offers all of the capabilities of etched glass, such as various opacities and gradients and illuminates them, perfect for projects that require wayfinding, signage, information displays, donor boards, and more.

LED Edge Lit Glass Overview

- Perfect for signage and branding
- Millions of colors to choose from
- Control lighting with included wireless remote
- Various lighting patterns
- Light up any etched or carved panel

Glass Sign Mounting Hardware

All of our glass signs can be mounted in a number of ways.

Z-Clip

Our concealed z-clip helps keep your hardware hidden and allows the glass panel to slightly float in front of the wall.

Stand-off Mounts

Our stand-off mounts, the edge grip and the stand-off are sleek, modern, visible glass mounts and hold the glass panels about an inch from the wall surface.

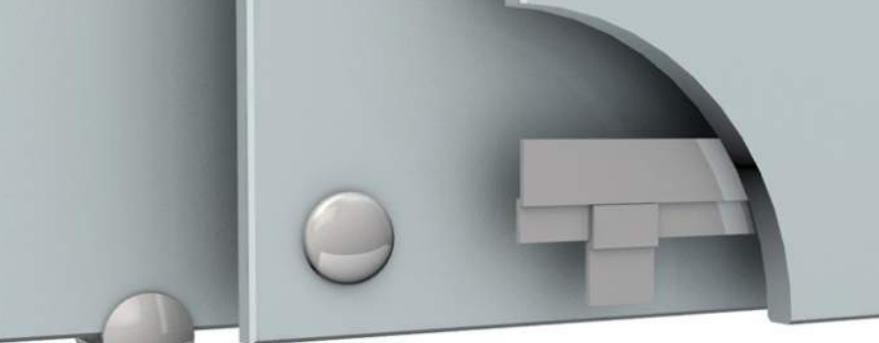

All of our glass sign hardware is available in the following:

- Polished stainless steel
- Brushed nickel
- Matte black

LED Edge Lit U-Channel

Our LED edge lit U-Channel mounts are applied to either the sides or top and bottom of the glass panel. Our exclusive LED lights are embedded within the U-Channel and the glass panel sits slightly above them allowing light to pass through the glass sign. The whole system is then mounted to your wall. This is the only compatible hardware for LED edge lighting.

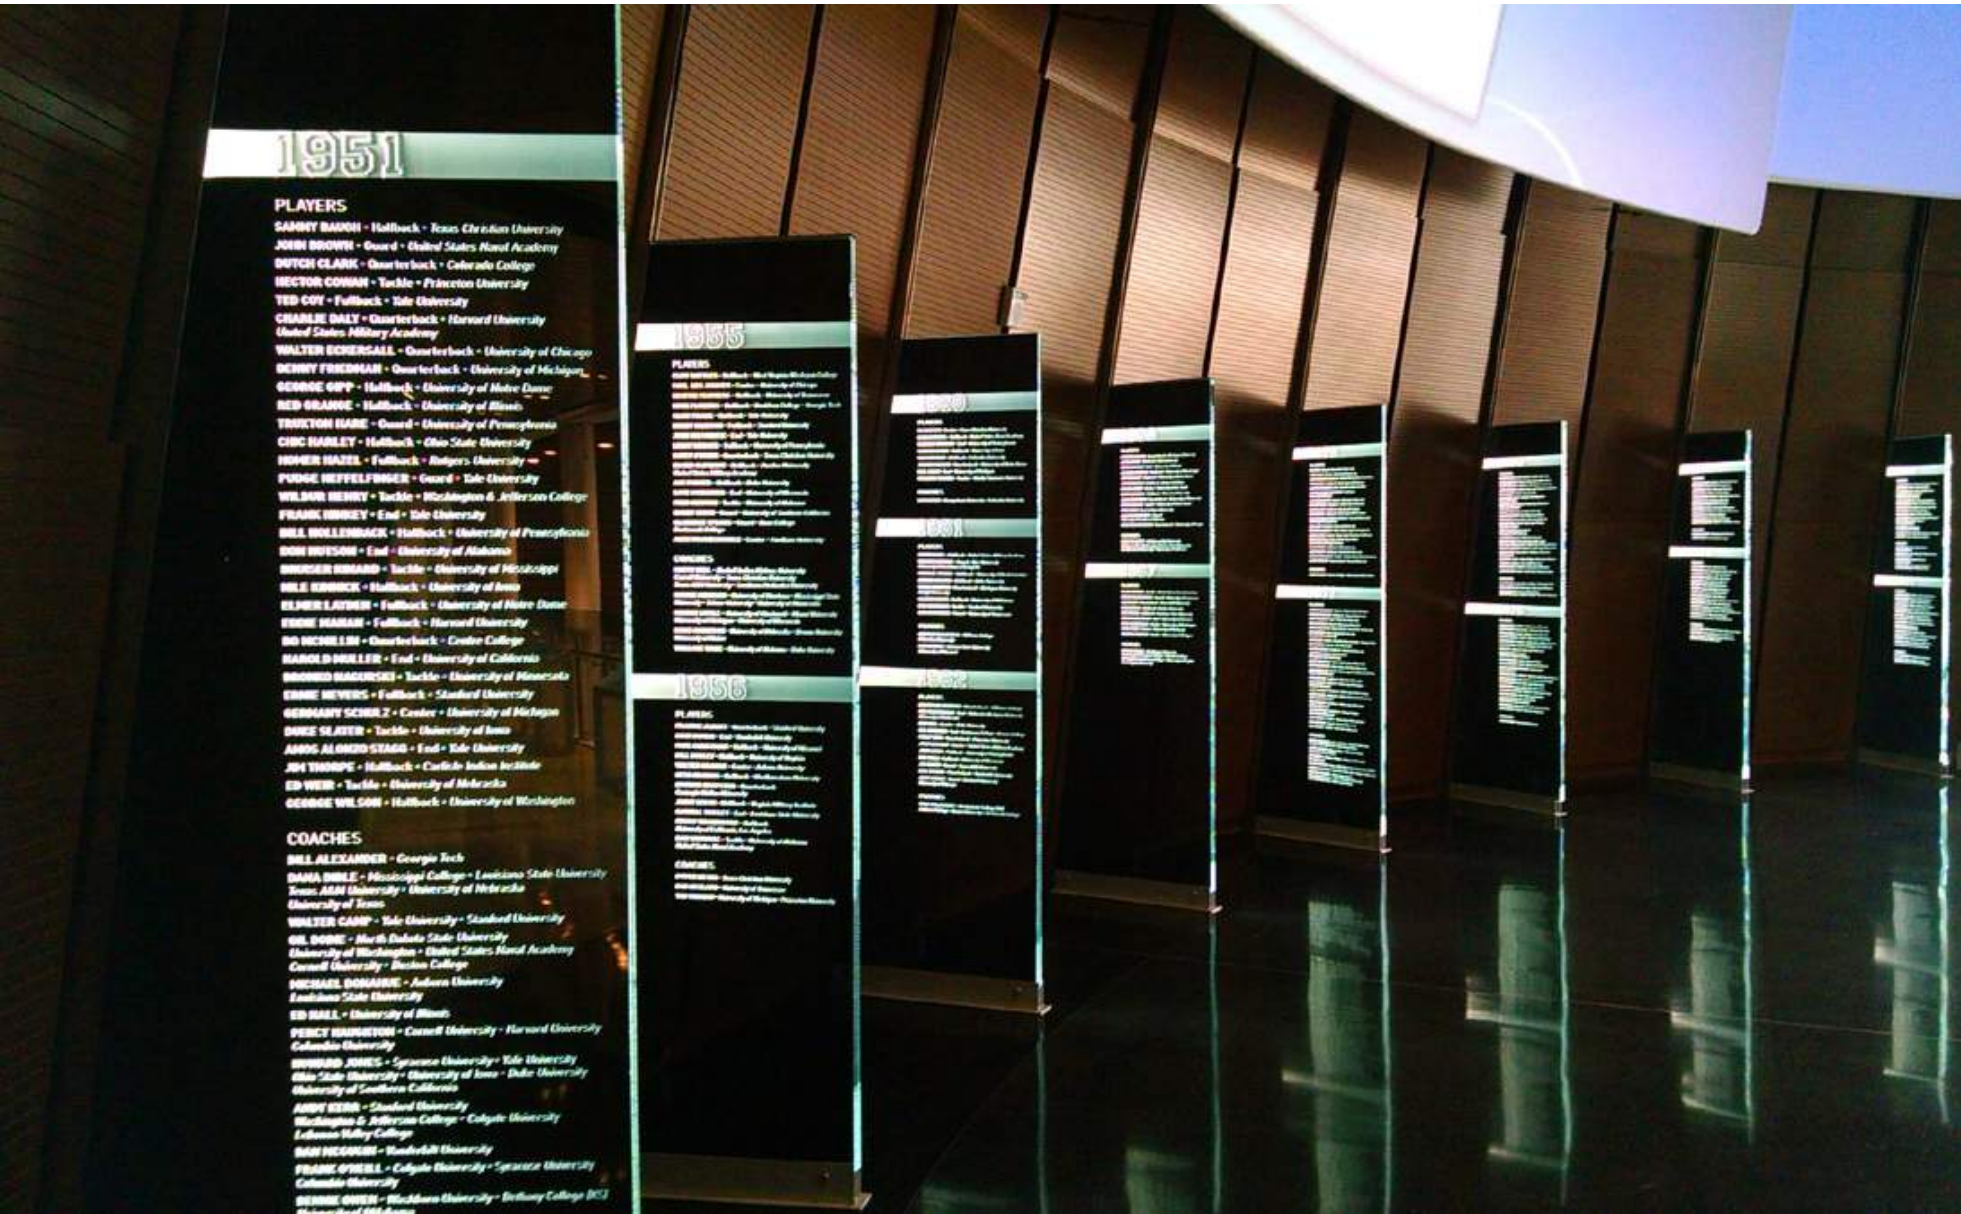

The specific size of your glass sign will dictate how many mounts you need. Our team will review your project with you and help you decide which glass hardware will be best for your unique situation and needs.

REMARKABLES GLASS WHITEBOARDS

REMARKABLES GLASS WHITEBOARDS

Remarkables Glass Whiteboards are an excellent solution for corporate offices, schools, and healthcare facilities. Perfect for high traffic areas and daily usage due to their tough, tempered glass design, they resist impacts and damage, are stain and scratch proof, and bacteria resistant.

About Remarkables Glass Whiteboards

Our Remarkables Glass Whiteboards are offered in a variety of options. Choose from a vast library of back painted colors, hardware mounting options, hardware finishes, sizes, and decorative glass services. We offer etched glass whiteboards, printed whiteboards, and laminated whiteboards beyond our standard back-painted options. You can even supply your own art work or we can create the artwork for you and print it directly to your glass whiteboard. This is perfect for workplaces like offices and hospitals that need glass whiteboards for data entry. To help with organization, we offer an optional magnetic backing to allow the use of magnets to hang documents.

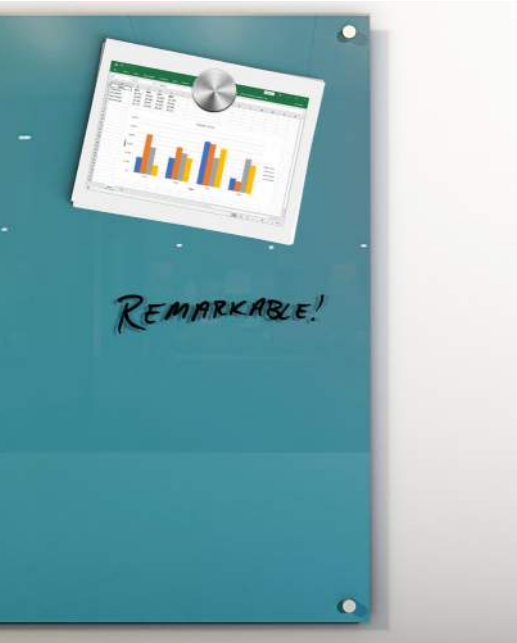

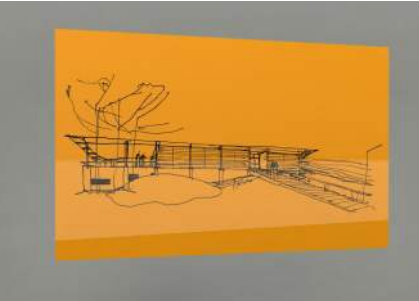

We have worked with a variety of industries and have supplied thousands of glass whiteboards throughout the country. Our goal is to offer you an unparalleled product and amazing customer service. Our glass whiteboards are fabricated in-house to ensure quality and quick turn-around. Whether you need a single glass whiteboard or hundreds, we can ensure you'll be pleased for many years to come with our Remarkables Glass Whiteboards.

MagTac Magnetic Backing

Our MagTac magnetic backing allows the use of magnets on the face of the glass whiteboard to post documents, trays, and other accessories.

Remarkables Glass Whiteboard Features

- Constructed from tempered glass to withstand impacts.
- Magnetic backing available
- Glass whiteboards are ghosting, stain, scratch, & bacteria resistant.
- Sizes range from 2' x 3' to 4' x 10'. Custom Sizes Available.
- 1/4" thickness to reduce bowing and flexing when writing.
- Use any pen from permanent markers to paint pens.
- The ultimate replacement over dry erase boards.
- Custom colors and printing available to extend branding and color matching.
- Thicker glass offered to reduce flexing and bowing when writing

LIT MIRRORS

LIT MIRRORS

Add another point of luxury in your environment. Lighted mirrors offer a touch of sophistication while adding an alternate lighting source for any space.

Using an eco-friendly silvering process in conjunction with energy efficient LED lighting, these lit mirrors reduce waste and are environmentally sound.

Our lighted mirrors are also waterproof adding to its already tough tempered glass design that won't fog up thanks to our defogging option on select models.

No matter your project specs, we have the lit mirror option for you. Our custom options include adding a touch sensor button, various mirror sizing options to fit your project, 3' power cable or hardwire options, and various decorative glass options like etched and frost glass patterns.

FGD Glass Solutions UL certified lighted mirror options also come in efficient LED or T5 lighting with both framed or frameless designs. Discover our lighted mirror options below or contact our project experts if you already have an idea of what you need.

Make your lighted mirror your own with our etched glass patterns. Choose from any of our current patterns or supply your own. We can also work with you to create a unique design that's specific to your project. This is great for extending your brand across various surfaces or adding new visual textures to your scene.

Lighted Mirrors Overview

- Custom etched border option
- Eco-friendly mirror silvering
- Efficient LED lighting
- Defogger option
- Touch sensor button option

LUMAWALL

ILLUMINATED GLASS WALL CLADDING

LUMAWALL ILLUMINATED GLASS WALL CLADDING

The LumaWall illuminated glass wall cladding system offers flexible and attractive design features that can be used to create a consistent design throughout your projects and multiple spaces.

LumaWall interior glass cladding systems are available either illuminated or unlit to suit the requirements of your project. With freedom of design, you are completely in control. In addition, no adhesives or glass drilling are required, making the system quick and easy to install, adjust and replace- saving you time and money.

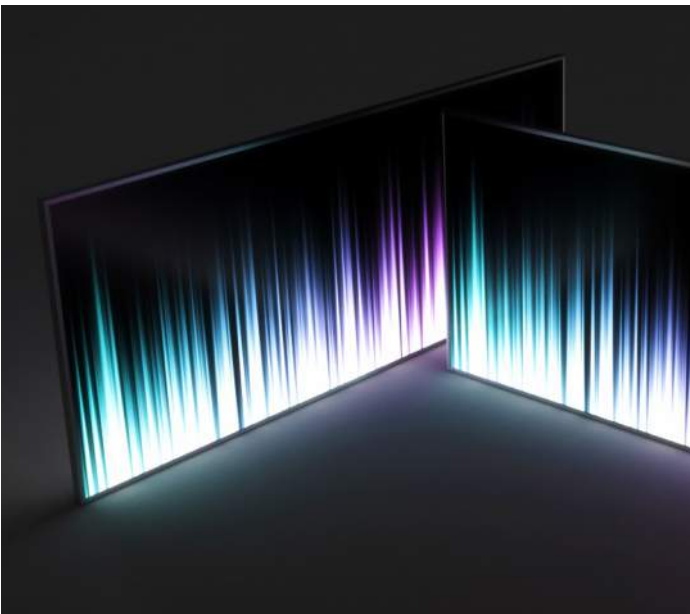

Unlimited Panel Options & Applications

Applications

LumaWall interior wall cladding offers a wide range of applications. They can be used on all projects, both small and large, and in any market. Some of the ways that they have been used in the past include enhancing walls, columns, and elevator interiors. There are many possibilities available with interior glass cladding from FGD Glass Solutions.

Panel Options

Our vast decorative glass library means that you have unlimited panel options. You can choose from printed, etched, laminated and back-painted glass. Also available are edge-lit panels with dimming, color, and lighting control. Our panels are manufactured in-house with our unique light dispersing technology reducing any hot spots, halos and dark areas, ensuring consistent lighting for all projects. LumaWall illuminated walls are fully customizable to the specific needs of your project.

LumaWall Points of Interest

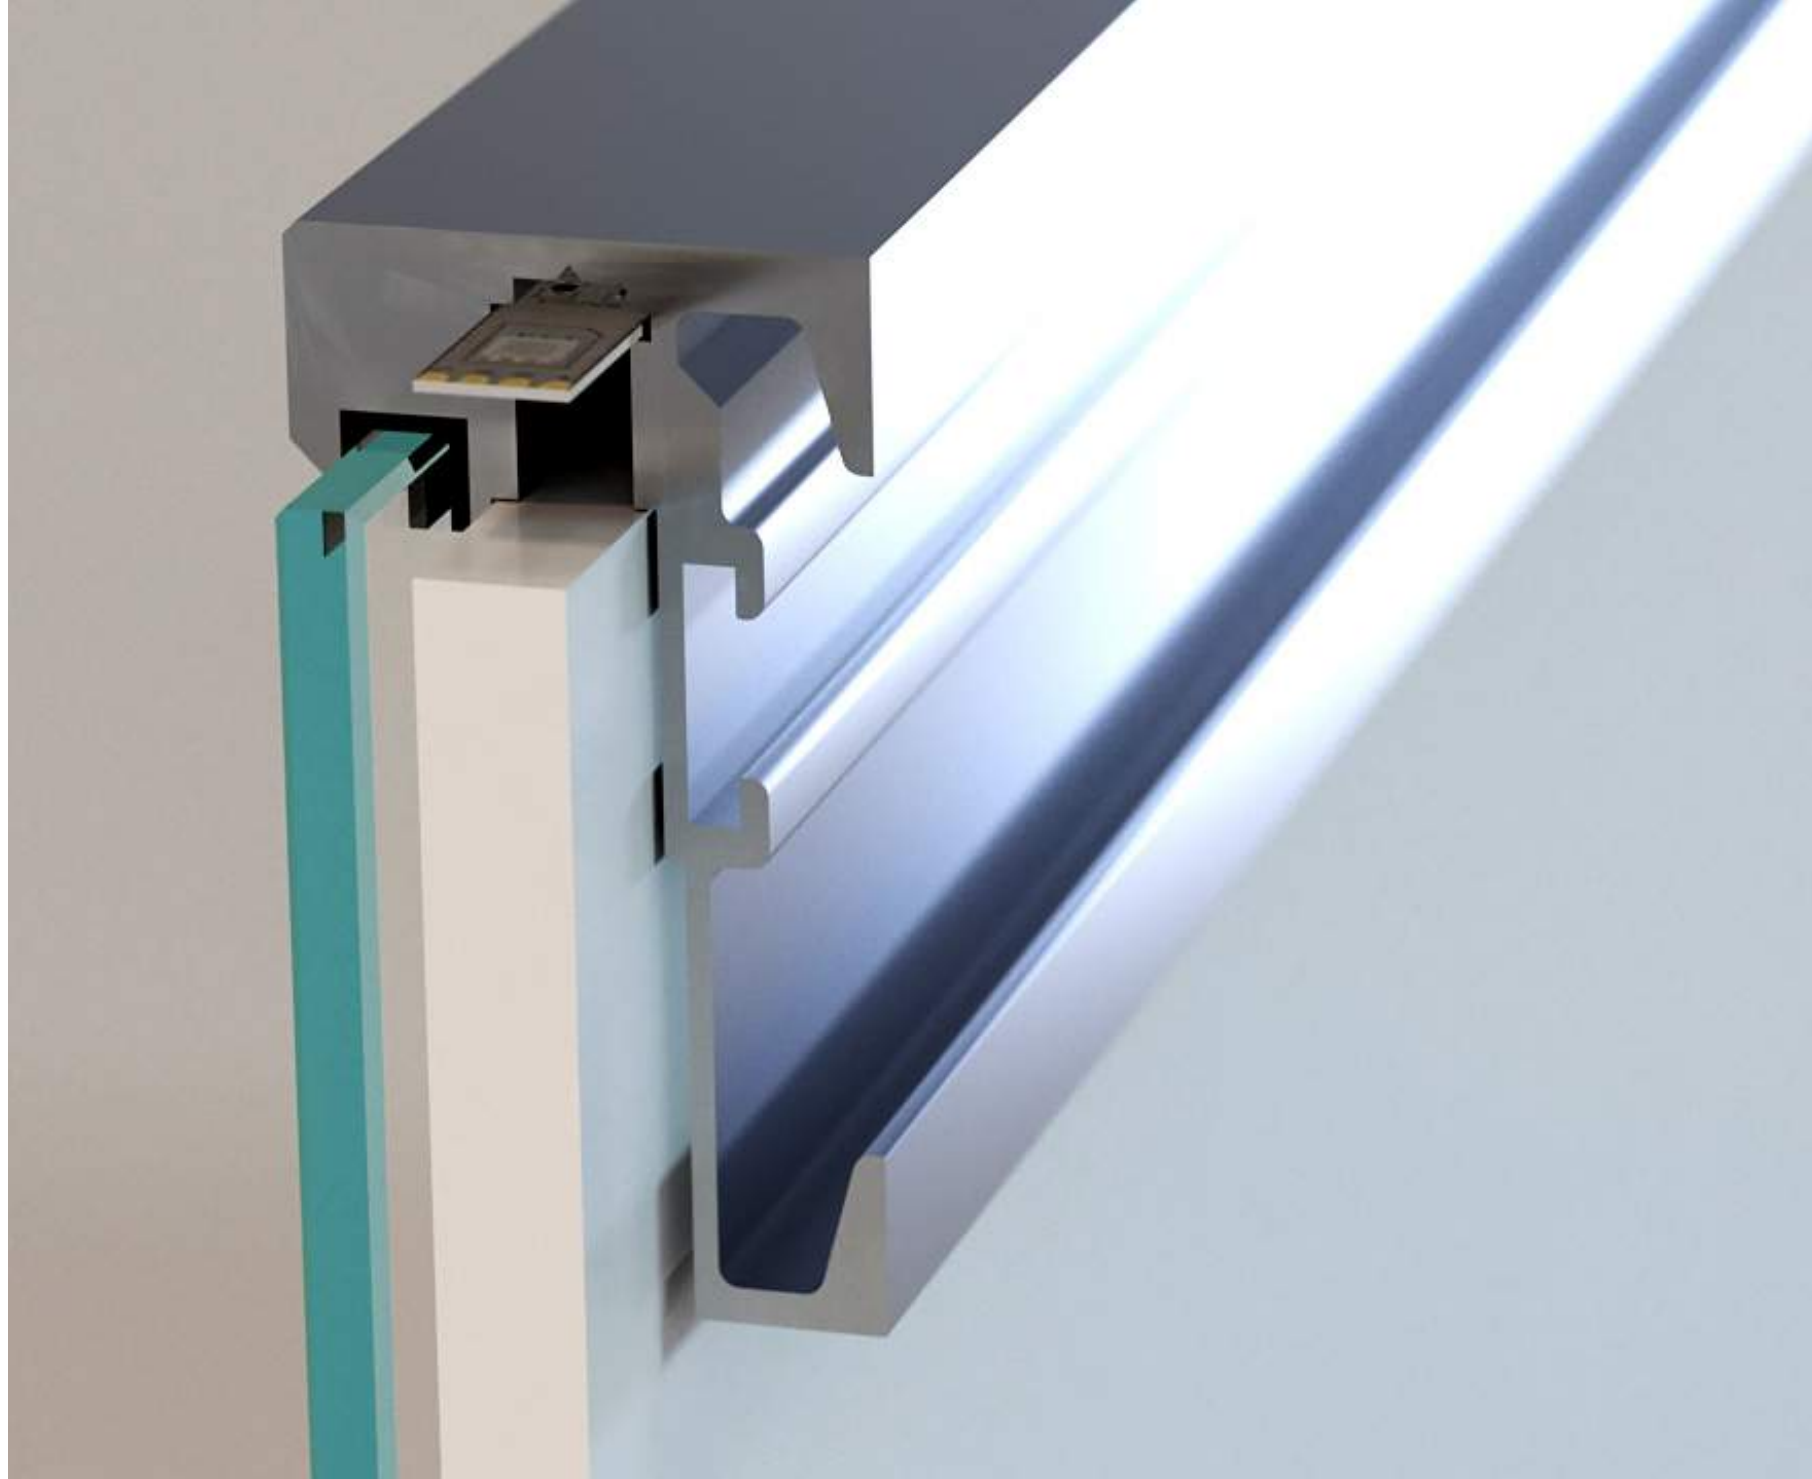

- Lit and Unlit Designs
- Full 360 degree LED lit panels without halos or hot spots
- Panels can be dimmed, change colors, and offer various LED lighting patterns and color gradients
- Pair LumaWalls with our etched, back painted, laminated, and print decorative glass options
- Fabricated in-house to reduce cost and achieve high QA
- Full turn-key product for fast installation saving money and time

LumaWall Decorative Glass Options

The LumaWall illuminated glass panels are compatible with our etched, printed, and laminated glass services offering you unique design possibilities to customize your project. The minimal bezel on the interior glass wall cladding helps to further enhance the aesthetics of the illuminated panels.

- Custom printed patterns & designs or browse our extensive library of decorative glass designs
- Laminated colors, patterns, and prints including custom printed interlayers
- Back painted in over 2000 standard colors with custom color matching options
- Etch and frosted designs available or submit your own designs. From full frost to gradients and anything in between

Technical Details

LumaWall Illuminated Glass Wall Cladding System offers a turn-key solution. The fast installation process of the glass wall mounting system means that you save time and money on your project. When the glass panels are illuminated, the LED shines through the acrylic piece refracting the light to illuminate the glass panel from behind with your choice of designs printed or etched on it. LED lights used with the LumaWall system can distribute the light in a range of colors, patterns, and brightness values to achieve your desired effect.

The LumaWall system is designed to make it easy to move individual panels for replacement or maintenance, avoiding the need to replace the whole system. Choose the panels that you need in square feet, and they will be fabricated in-house to meet your specific needs.

Technical Points of Interest

- Quick and secure installation
- Minimal bevel doesn't restrict aesthetics
- Fabrication and install reduces labor costs
- Individual panels can be moved for replacement or maintenance.

LumaWall Technical Specs

Max Panel Size: 60" x 120"
Glass Thickness: 1/4" to 5/16"
Max Weight: 300lbs
LUX: White =1900/FT, RGB = 900-1200 (depending on color value)
Light White Balance: Standard 6000k with other temperatures available
Power Consumption: White 6.1W/FT, RGB=10.5W/FT
Programmability: Static Color, Dimmable, DMX Controlled w/RGB's
Materials: Aluminum
Lit Panel: Acrylic
Front Panel: Glass (low-iron or standard clear)
Finishes: Satin, Flat-Black, Chrome

BARN DOORS

BARN DOORS BY FGD GLASS SOLUTIONS

We offer a wide range of stylish barn door panels and hardware that will match any design. Our barn doors have a focus on hospitality and corporate needs by offering turn-key packages that meets the high-volume demand without sacrificing quality and style.

A perfect example of function and style, barn doors save space without sacrificing looks. Pair decorative glass or wood panel barn-doors with a wealth of hardware styles and finishes to ensure a sleek, space-saving barn door with impeccable design. We also offer options like soft close function and patch locks for your clients convenience.

Our barn door panel options offer you an array of styles that will fit exactly what you're looking for. Choose from wood panels with glass and mirror inserts to all glass panels. We also offer multiple barn door wood finishes from dark wood stains to white painted doors and everything in between.

Our glass barn doors are offered in a variety of styles from mirror doors to fully frosted designs. You can add color to your space with our back-painted glass barn-doors, or add your own unique style with our printed glass option. Etched and frosted glass barn door panels are a great look to allow light transfer while still allowing privacy or to hide the contents of a closet. You can also display your unique style with our laminated glass and glass printing option allowing you to print custom designs on your glass panels. Our suite of decorative glass patterns are also available to apply to any of our glass doors.

GridVue Barn Doors

Glass barn door panels offer so many decorative options, you'll be sure to find exactly what you're looking for. From mirror doors to fully frosted panels or get colorful with our Decorlite back-painted glass options.

You can choose from our decorative glass patterns and utilize them with your barn door via our etching, film, print, or lamination options. Print full color images, graphics, and patterns to create an amazing focal point. Your options are limitless. Our tempered glass panels come in standard clear, low-iron, frosted, mirror, and antique mirror options with a standard starting thickness of 3/16".

GridVue Buckingham With Metal Mullion

GridVue Windsor With Printed Mullion

Wood Door Panels

Our wooden barn door panels are offered in a variety of styles and finishes. From traditional shaker and rustic styles to more modern and clean designs. Finishes range from a clear finish to showcase the raw wood underneath for a natural look to dark stains and colorful paints.

Combine our wood barn door panels with our decorative glass options. Integrate frosted glass or mirror inset panels within the wooden frame. Select from back-painted, printed, frosted, or mirror options to create a unique piece for your space. Choose from our extensive library of patterns, colors, and decorative glass options or go custom and specify your own specific colors and patterns.

All of our barn doors are compatible with our hardware options allowing you to mix hardware and barn door options so you can find that perfect look for your environment. Choose your barn door hardware finish and handle style to polish off your look.

Barn Door Hardware

From clean and classic, to bold and modern, our barn door hardware is guaranteed to match your vision. All of our hardware is crafted from stainless-steel in up to 6 standard finishes and in top mount and face mount variants. Our handle options match seamlessly in finish, styles, and durability and have been selected to compliment all of our hardware styles. Now you just have to pair the perfect door with that amazing hardware.

Wood barn door hardware features top and face mount designs depending on the look you want to achieve while our glass barn door hardware is face mount only due to the glass not being thick enough for a top mount design.

Both wood and glass barn door panels are compatible with our concealed header hardware that features a clean design with all hardware, tracks, and wheel stored within the concealed header.

GLASS SHOWERS

GLASS SHOWERS BY FGD GLASS SOLUTIONS

We pride ourselves on serving the hospitality design community with a variety of glass shower doors. From bulk turnkey projects needing hundreds of units to boutique hotels, condos, and multi-family projects requiring custom, smaller orders, we are capable of meeting your design and project needs.

Featuring modern and classic glass shower models, custom decorative glass and adjustable sizing, shower layout, and glass thickness based on your glass shower door and project needs.

For those seeking a pure one-of-a-kind shower, our design services can help you create a bespoke, custom glass shower unique to your brand or design.

A new shower door can produce a completely different look to your bathroom project overall. To learn more about your choices in shower doors, hardware and accessories, contact the experts at FGD Glass Solutions. We are ready to help you take your bathroom project to the next beautiful level.

Shower Door Designs

Our glass shower doors are offered in a variety of layouts and options to best suit your needs and space. Sliding and by-pass sliding shower doors require little space and offer a high end function and appearance hotel guests are looking for.

Pivot or hinged glass shower doors are great for more narrow spaces and offer a more traditional operation. Pivot doors can also be opened inward or outward and can be paired with a fixed panel for wider openings.

The two main design features of glass showers are framed and frameless designs. Framed glass showers offer a metal border, often aluminum, around the shower opening and the sliders are stored within the framed header. Oppositely, frameless glass showers offer exposed sliding hardware and no metal border around the shower opening offering clean lines and less bulky visuals for a more elegant and upscale appearance.

Glass Shower Points of Interest

- Glass showers are fabricated specifically for each project
- Shower hardware crafted from stainless steel and brass in a range of finishes
- Glass shower doors are offered in low-iron and standard clear
- Glass showers fit openings from 30" – 72"
- Custom glass shower layouts available
- Glass shower doors thicknesses range from 3/16" to 3/4"
- Shower handle options are available with a matching towel bar or as a handle/towel bar combo
- All glass shower doors are compatible with any of our decorative glass patterns and services
- Optional DecorShield application for all glass shower doors helps repel water stains and scum

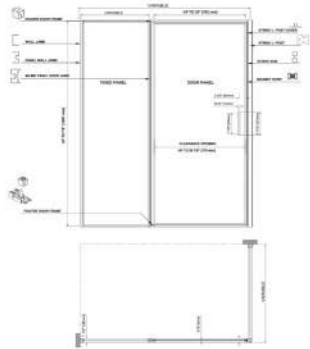

Tahiti GridVue Glass Shower

Our GridVue glass showers offer modern styling in a variety of configurations and hardware options. The Tahiti features a cladded metal grid pattern and flat-black hardware with your choice of handle and configuration layout.

Points of Interest

- Aluminum framed door
- Single pivot corner enclosure
- Many handle and towel bar options available
- Various configurations available within the same series
- Chrome, brushed stainless, brushed bronze and satin black hardware finishes available
- Custom made to fit the opening

Shower Kit Parts

Header: This is the top bar that the glass panels slide across.

Sliders: These pieces have wheels that slide across the header hardware. They are attached to the glass panels and lock around the header.

Handle and Towel Bar: Handles are offered in a variety of styles and will match the rest of your hardware finish. You can choose between a handle, handle and optional matching towel bar, or a handle/towel bar combo.

Mounting Hardware: These pieces attach your retaining glass panels to your wall structure. Options include a square mount, beveled edge mount, or a U-Channel mount. These pieces also match your hardware finish.
