How Does Maintenance Impact Profitability?

The next time you think "I'll get to it next week" – remember this post.

Direct Cost Savings

Planned repairs cost 3–5× less than emergency ones.

A \$200 bearing replacement vs \$5,000 spindle rebuild = same problem, very different price.

**Smarter Maintenance.
Stronger Operations.**

Production Uptime

100+ hours of preventable
downtime per year.

At \$150/hr machine rate, that's
\$15,000+ in lost capacity per
machine.

**Smarter Maintenance.
Stronger Operations.**

Labor Efficiency

Reactive shops average 12–15 hrs/week on emergency fixes.

PM cuts that to 4–5 hrs. The rest becomes billable work.

**Smarter Maintenance.
Stronger Operations.**

Equipment Lifecycle

Properly maintained equipment lasts 30–50% longer. That's 5–10 years of additional asset value before replacement.

**Smarter Maintenance.
Stronger Operations.**
