

9 BREATHWORK Integration Guide

Supporting Your Continued Transformation

What is Integration?

Integration is the process of **anchoring** your breathwork experience into lasting change. Without proper integration, even profound sessions can fade like a dream.

This guide helps you **maximize** the healing potential of your 9D journey.

The Vulnerable 48-72 Hour Window

Your nervous system remains in a heightened state of neuroplasticity for 2-3 days after breathwork. During this time:

You may feel more emotionally sensitive
(crying easier, stronger reactions)

Energy sensitivity increases
(crowds may feel overwhelming)

Dreams may be more vivid as your
subconscious processes

Old patterns may feel uncomfortable
as you've energetically shifted

This is completely normal and actually a sign of **positive change**.

Immediate Integration Support (1-3 Days)

✓ **Prioritize Rest**

- Get extra sleep—your nervous system is recalibrating
- Honor your body's need for downtime
- Avoid overstimulating activities when possible

✓ **Physical Care**

- Stay hydrated—breathwork is detoxifying
- Eat nourishing whole foods to support your system
- Take warm baths with Epsom salts to help integration
- Gentle movement like walking, stretching, or yoga

✓ **Nervous System Support**

- Spend time in nature—trees and earth help regulate your system
- Practice grounding: Feel your feet on the earth, touch grass or soil
- Breathe consciously: Longer exhales calm your nervous system
- Limit stimulation: Reduce screen time, loud environments, intense conversations

Ongoing Integration (1-4 Weeks)

Capture Your Experience

Journal freely - *insights often emerge gradually*
Record dreams - *your subconscious continues processing*
Note patterns - *what feels different in your daily life?*
Trust the process - *not everything needs immediate understanding*

Creative Expression

Draw, paint, dance, or create music
Let your experience move through artistic expression
There's no "right" way - *follow what feels alive*

Community & Support

Share wisely - choose people who can hold space for your experience
Seek support if anything feels overwhelming
Connect with fellow breathers who understand the journey
Consider therapy for deeper integration of what surfaced

▶ Red Flags - When to Seek Support

Contact your facilitator or a mental health professional if you experience:

- Persistent **depression or anxiety** lasting more than a few days
- Inability to **function** in work or relationships
- **Suicidal thoughts** or **self-harm** urges
- Persistent **dissociation** or feeling **disconnected** from reality
- **Flashbacks** or **trauma responses** that feel unmanageable

Grounding Techniques for Daily Use

5-4-3-2-1 Technique

5 things you
can see

4 things you
can touch

3 things you
can hear

2 things you
can smell

1 thing you
can taste

Box Breathing

Repeat for 4 cycles

Physical Grounding

- Feel your feet firmly on the ground
- Hold a cold object (ice cube, cold water)
- Press your palms against a wall
- Squeeze and release your muscles

Remember

- Integration is unique to you - trust your own timeline and process
- Healing isn't linear - ups and downs are part of the journey
- Your inner wisdom knows - what needs to emerge will emerge when you're ready
- You're not alone - support is available when you need it

NEED SUPPORT?

Your Facilitator: [Contact information]

Trust the process. Trust yourself.

Your healing journey is sacred and exactly as it should be.
