Course description

This engineering course will be taught using best practices in building a station utilizing the FX Appliance efficiencies. It is important that the student is already N4 TCP certified so that our focus can be on these skills

- Designed for system integrators and engineers with experience and Niagara 4 TCP and Johnson Controls Facility Explorer Field Controllers.
- The course concentrates on the unique features of the FX Workbench Pro and contrasts differences between traditional Niagara 4 Workbench
- The course is delivered over 2.5 days.
- All students are encouraged to work through series of labs designed to reinforce learning.
- All demonstrations are provided using real-life software environment.
