What do I need:

- Laptop and internet connection
- Niagara workbench 4.14 installed and licensed (We can provide installation files and training license)
- Administration Rights to the Laptop (so you can install software, access services, firewall ports, IP settings, users, etc.)
- The last few course modules require using JACE controllers – if you have JACE-8000 or JACE-9000 you can do them at your place. If you do not have hardware, you can contact us, and we can schedule time that is convenient for you and give you remote access to our training equipment so you can complete these modules.

Class Pre-requisites:

- Send your payment (Purchase Order or visit htttps:\\truebluecontrols.com for payment options). Your class registration will not be confirmed until payment is received & accepted.

Why should I enroll in this course?

- We are the only Tridium Niagara 4 certified partner in the world that can provide all Niagara 4 certified training courses.
- We are the only company in the world that provides real, fully self-paced Niagara 4 TCP Certification
- We are a dedicated training organization, specializing in technical disciplines and providing training courses in the areas of engineering, networking, Smart Buildings, IoT, digitalization, automation, cybersecurity, and related subjects.
- We are serving educational, commercial, IT, data canter, retail, financial industries, among others.
