

Submission process

R&D tax credit claims are monitored and processed by HMRC and you can make a claim going back 2 accounting periods

Step 1: Information gathering

Your time ~ 1 hour

Our chartered tax advisers and sector specialists will gather all the information we need for your claim from you directly. We will create a bespoke methodology based on your records

Step 2: Creating & Submission

After creating a submission pack we will share our reports with you for approval and will explain our findings. We will file your R&D tax credit claim for you via your Corporation Tax return (CT600) or work with your accountant to do so

Step 3: Receiving your benefit

You are rewarded for your investment in innovation and your Corporation Tax bill will be reduced or your cash benefit is paid into your bank account. That's money to spark your next big idea and fuel your continued growth.
