CONSENT AND RELEASE AGREEMENT

REVIEW THE FOLLOWING STATEMENTS AND INITIAL TO VERIFY YOUR UNDERSTANDING

_____ I have been quoted for the cost of today's procedure and informed of the touchup price. I understand that the initial touchup is to be performed within 60 days in order to be booked at the touchup rate. If I book anytime after that, I may be subjected to pay full-price for the service requested.

_____ I understand that anesthetics have varied effectiveness on each person and that discomfort or pain may persist even after a topical anesthetic has been applied.

_____ I understand that some minor swelling, redness, and bruising may occur from this procedure.

_____ I understand that as with any broken skin, there are risks associated with the procedure(s). And that, though rare, there may be complications such as infection, poor color retention, and hyper pigmentation. Proper aftercare practice can help minimize my risk.

_____ I have been provided aftercare instructions, which I will follow to the best of my ability. If any questions or concerns arise, I will notify my cosmetic professional.

_____ I accept the responsibility to decide and explain my desired colors, shapes, and positions for any procedures performed as agreed upon during consultation.

_____ I understand that products containing Retin A, alpha hydroxy, and glycolic acids shall not be used on the treated areas because they may alter the color or cause the pigment to exfoliate prematurely.

_____ I will tell any skincare professionals or medical personnel about my semi-permanent makeup procedure(s), especially if I am to receive an MRI. I understand that this is because the pigment used may contain magnetic minerals.

_____ I understand that exposure to the sun, tanning beds, pools, some skincare products and makeup, sweat, and medications can affect my semi-permanent makeup.

CONSENT AND RELEASE (CONTINUED)

_____ I acknowledge that faces are not symmetrical and adjustments will be made to reduce the appearance of asymmetry.

_____ I have been advised that the pigment is semi-permanent and will fade over time, sometimes unevenly, and understand that touchups will be needed.

_____ I understand that color saturation is not guaranteed and may be negatively affected by hidden scar tissue. I also acknowledge that pigment color may change or fade over time due to circumstances beyond my cosmetic professional's control. I have been informed that some reasons for this include poor healing, improper aftercare, infection, bleeding, and other causes unique to my skin.

_____ I understand that the initial touchup session is meant to correct any fading, unforeseen changes, or uneven appearance.

_____ I understand that infection is rare, but may occur and is serious. I acknowledge that I am to keep the treated areas clean. I will refer to and follow the provided aftercare instructions to be as preventative as possible. I certify that I will contact a medical professional should there be any sign of infection.

_____ I understand that I can have an allergic reaction to products, tools, or materials used. I have been offered a patch test and understand that even if a patch test is performed, it does not guarantee against an allergic reaction. If the patch test is waived, I release my technician from liability if I develop an allergic reaction. I will initial to indicate one: _____ WAIVE the patch test _____ TAKE the patch test

I, _____ certify that I have read and initialed the statements above to verify my understanding and consent. I fully accept the responsibility for the decision to have this work done and give full permission to my hair stylist.

RISK ACKNOWLEDGEMENT

This document will describe the possibilities and side effects associated with semi-permanent cosmetic tattoos. Please review the following information and sign to verify your understanding.

DISCOMFORT/PAIN: There is associated pain and discomfort that may persist even after topical anesthetic has been applied. Effectiveness of anesthetics and pain tolerance may vary depending on each individual.

INFECTION: Infection is rare, but may occur and is serious. I acknowledge that I am to keep the treated areas clean. I will refer to and follow the provided aftercare instructions to be as preventative as possible.

APPEARANCE: Fading, patchiness, unevenness, and lack of retention may occur. Various factors contribute to these complications such as poor healing, improper aftercare, infection, bleeding, and other causes. Other products and exposures may also alter the final result.

SWELLING/BRUISING: Some individuals may bruise or swell following the procedure.

ASYMMETRY: Faces are not necessarily symmetrical, so while every effort will be made to avoid asymmetry, adjustments may be required during the touchup session to correct any unevenness.

ALLERGIC REACTIONS: Some individuals may have an allergic reaction to numbing agents or pigments used. A patch test may help avoid adverse reactions but cannot guarantee against them. It is the client's responsibility to inform their cosmetic professional of any known allergic reactions or sensitivities.

MRI: Clients are responsible for informing medical professionals about any semi-permanent makeup procedures received, especially if they are to receive an MRI. This is because the pigment used may contain compounds that are magnetic.

EYEBROW TATTOO AFTERCARE

This document will provide the necessary information to care for your new semi-permanent brow tattoo. This information is meant to serve as a guideline and does not guarantee results. Each person's skin responds and heals differently. Healing time, resulting color, retention, touchups required, and scarring will vary depending on each individual.

WHAT TO EXPECT

You may experience discomfort, mild pain/sensitivity, swelling, and redness immediately following the procedure. The feeling you will experience may resemble a similar sensation as a sunburn. These initial symptoms should subside within 1-3 days. Avoid the sun, heavy exercise/sweating, direct contact, and wetting for the first 10 days after the procedure.

DAYS 1-3: At first, the initial treated areas will appear darker, bolder, and more defined than the final result. Please be aware of this and do not worry, as the final appearance will soften after the healing process is finished.

DAYS 4-10: Around day 4 or 5, your brows will have scabbed and begin to flake. DO NOT scratch or remove the scabs. Please note that picking, scratching, or removing healing skin from your tattoo may result in loss of pigmentation. It may also put you at higher risk of infection. Patience...They will fall off on their own and any adjustments needed will be corrected during your touchup

DAY 10 THROUGH TOUCHUP: You may resume exercise, sun exposure, wetting (showers, facial cleansing, etc.) at your own discretion when your tattoo is done scabbing. They will appear lighter and softer and may darken slightly as the skin regenerates and fully heals. Patchiness or loss of pigment will be addressed and corrected during your touchup.

CARE INSTRUCTIONS

Do not apply any makeup or products other than aftercare ointment until your tattoo is healed with no flakes.

DAYS 1-7: At the beginning and end of each day, use ink shampoo on clean fingertips to gently cleanse your eyebrows. Blot gently to dry. Use a soft patting motion, do not rub. Once completely dry, apply a thin layer of aftercare ointment. Repeat ointment application whenever the face is cleansed.

DAYS 8-14: You may resume exercise, sun exposure, and regular wetting at your own discretion when your tattoo is done scabbing. Continue to avoid chemical peels, exfoliating, and products containing retinal, alpha hydroxy, and glycolic acids until touchup.
