# 100% Cloud-Managed.
100% Simplified.

The Cisco Meraki portfolio simplifies IT dramatically, with the entire product portfolio centrally and securely managed from the cloud. The feature-rich, intuitive architecture enables users to save time, reduce operating costs, and solve new business problems, more immediately. Over a million networks around the world are benefiting:

- Manage entire networks from a single dashboard
- Centralized control of users, applications, and devices
- No hardware controllers or management software

- Integrated firmware updates & feature releases
- Scalable from small sites to million-user deployments
- Reduced cost of implementation and maintenance

| MR WIRELESS | MS SWITCHES | MX SECURITY | MG CELLULAR GATEWAYS | INSIGHT | MV SMART CAMERAS | MOBILE DEVICES MANAGEMENT |

Software-defined Access
Provide access to any user, device, or application from the edge to the cloud, while maintaining robust security

Software-defined WAN
Connect any user to any application over the Wide Area Network without compromising security or user experience
IOT
Protect your devices and premises

The Magic behind the Management: Meraki Dashboard
The Meraki dashboard enables network administrators to view networked clients, bandwidth consumption and application usage across all sites – and push policies to block, shape, or whitelist activity to optimize performance and user experience.

Wi-Fi CERTIFIED 6™ Meraki Access Points:
The Next Evolution of Connectivity

Organizations are preparing for a digital future faster than ever before with the explosion in remote work, video collaboration and Wi-Fi calling all on the rise. To take full advantage of these trends, a Wi-Fi 6 network infrastructure is more important than ever to ensure 802.11ax clients experience high-quality and low-latency performance.

To help organizations on this journey, Cisco has doubled the size of their Wi-Fi CERTIFIED 6™ family by releasing three new Wi-Fi 6 access points, adding enhanced troubleshooting capabilities, and additional security features. These APs also offer screaming fast, high-performance Wi-Fi 6 to outdoor areas and focused coverage areas.

Take your Wi-Fi Connections to the next level with Wi-Fi 6

75% LOWER LATENCY
for seamless video conferencing

3X FASTER
than standard 802.11ac

IMPROVED SECURITY
against wireless hacking

4X CAPACITY
for additional connected devices

Contact us today to start developing a cloud-managed strategy that ensures success tomorrow with Cisco Meraki solutions:

Rapidly adapting in a dynamic environment
From enabling remote workers to be more productive, or delivering a healthy connection to remote resources, Cisco Meraki enables turnkey access from any device to any cloud.

Uniting your workforce
Cisco Meraki is the perfect platform to transition from on-site to on-line with a complete, unified portfolio, including networking, security, device management and smart cameras.

Managing multi-site deployments via the web
The Cisco Meraki cloud-based dashboard requires only an internet connection to access and manage all of your deployed infrastructure, regardless of location.
