# Uncovering the Dangers of Complex Security

In a world in which the biggest obstacle to effective security is growing complexity, Cisco is on a mission to simplify. Cisco's Integrated Threat Defense approach will help organizations address the security challenges of the Digital Economy:

Complex Infrastructure

New business models are multiplying the points of infiltration into the network

Security Patchwork

Dozens of security solutions from different vendors that often do not interoperate well

Sophisticated Attackers

Attackers exploit visibility gaps created by complexity and fragmentation to penetrate the network

Eliminating these challenges becomes possible when turning to the **Industry's Most Effective, Integrated Security Portfolio** which spans from the endpoint, protecting laptops and roaming users, to the gateway with security on-premises or in the cloud, and of course protecting the network with leading security appliances and segmentation technology:

- Advanced Malware Protection
- Cloud Security
- Email Security
- Endpoint Security
- Network Visibility and Segmentation
- Next-Generation Firewalls
- Next-Generation Intrusion Prevention Systems
- Router Security
- Security Management
- VPN Security Clients
- Web Security

WHEN CISCO PRODUCTS ARE USED TOGETHER AS AN ARCHITECTURE THEY DELIVER A NEARLY

40% COST ADVANTAGE

Cisco delivers security efficacy and budget efficiency*

Did you know Cisco has the largest Security Intelligence & Threat Research Team in the Industry?

Talos is Cisco's industry-leading team of security experts focused on protecting organizations' people, data and infrastructure with superior cyber threat intelligence. Over the last 10 years Talos has built one of the most comprehensive intelligence gathering and analysis platforms in the industry. Talos tracks threats across end points, networks, cloud environments, web, and email providing a comprehensive understanding of cyber threats and solid, actionable intelligence.
250 Full-time Researchers

160 Countries

1.5 Million Malware samples analyzed per day

TALOS

WEB · NETWORK · CLOUD · ENDPOINT · EMAIL · VIRTUAL

19.7 Billion Threats blocked per day

600 Billion Emails inspected per day

16 Billion Web Requests per day

An Economic Impact Study by Forrester Consulting (November 2016) revealed the following three-year risk-adjusted results:

- **38% ROI** from moving to Cisco's integrated security architecture vs. standalone solutions from disparate security vendors

- **70% SECURITY EFFICIENCY GAINS** from improved threat detection, incident resolution, and reduced user down-time

What the Experts Are Saying:

"Cisco is the clear leader in Data Center Security", *Infonetics Research*

"Cisco...best transaction among security vendors", *Goldman Sachs*

"Cisco's Network Security Portfolio finally stands on its own merit", *Forrester*

"Of all security vendors, Cisco is most likely to dominate the data center market", *Barclays*

CONTACT US TODAY so we can introduce you to the most effective, integrated security portfolio in the industry.
