

# Reinvent the Experience with ProAV

At a time when information is more vital than ever before, ProAV solutions such as signage displays and video walls are essential in broadcasting critical content in a safe and sensitive manner as consumers begin to emerge and employees begin to return during the current and post COVID era.

## Blueprint for Reception/Lobby Impact

### Video Wall

Capable of incredible visual designs at a scale that no other technology can match, video walls are king where impact is concerned to create excitement, engender engagement and build atmosphere in the most impressive ways.

### Digital Signage

Make the shift from a one-size-fits-all messaging approach by employing digital signage systems that stream tailored, branded content specific to audience needs and desires.

### AVoIP

AV over IP distributes audio, video, and control signals more reliably and cost effectively over IP Networks with PoE support based on network demands and desired image quality.

### Power & Connectivity

Confidently transmit your signal and your message with connectivity solutions that enable full UHD with deep color and high dynamic range to deliver a 4K experience as it is meant to be.

# The Next Normal for ProAV Solutions

Now, during the COVID-19 era and as we collectively move toward a new normal, the need for responsible social distancing and health/safety precautions continue to be adopted in public spaces. Dynamic, fully customized ProAV solutions have never been a more important tool in helping organizations and facilities deliver real-time messaging to reduce front desk traffic and close proximity communication.

## Queue Management

Visually communicate establishment capacity and enter/wait messaging

## Self-Serve Kiosk Displays

Enable contactless check-ins at hospitals, ERs, clinician offices, restaurants, hotels

## Telemedicine

Centrally managed to ensure clear, consistent messaging across healthcare campuses

## Retail & Restaurant Menu Boards

Browsing, selecting, and acquiring a subset of items from a master collection of items

## Public Announcements

Communicate security and prevention measures for continued health and safety

## Routing/Wayfinding

Direct consumers/employees/patients/visitors to intended destinations more rapidly

## POS Integration

Advertise the availability of and purchase limits on much-needed products

## AI Smart Signage

Leverage infrared temperature sensors, advanced algorithms, and biometric recognition
