

**QUALITY ASSURANCE BULLETIN #387a  
NORTH AMERICAN VEHICLE LOGISTICS**

**24-August-2021**

**To:** USA/Canadian Carriers Transporting Ford Product

**Subject:** Update on Number of Keys/Fobs for Ford Mustang Mach-E

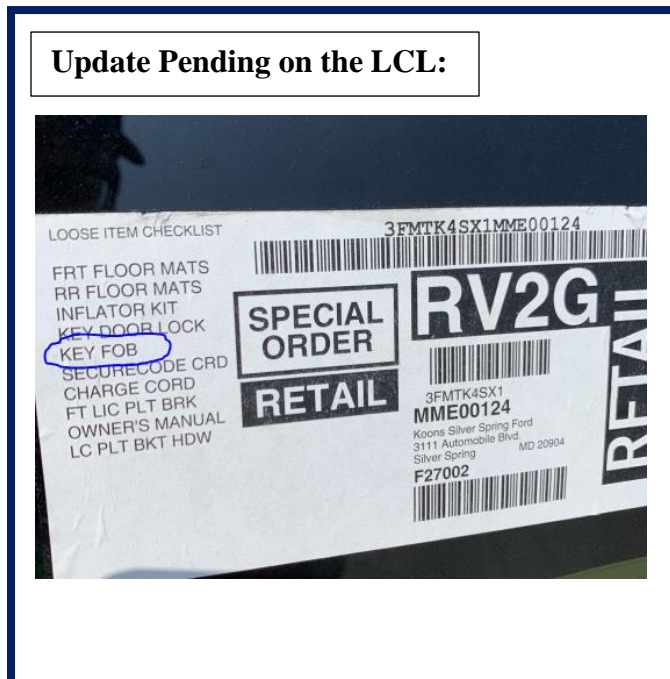

The purpose of this bulletin is to make all transporters of Ford Mustang Mach-E vehicles aware that **effective 2022 model year**, 100% of these vehicles coming into the United States or Canada will come with **TWO (2) Key Fobs & TWO (2) emergency key blade dummies** (not programmed; just an insert into the fob). Please see images below. Previously, 100% of these Mach-E's only had one (1) key fob & emergency key blade dummy.

**For the balance of the 2021 MY units:**

-All Mach-E **GT**'s will have **TWO (2)** key fobs & key blade dummies.

-All **non-Mach-E GT**'s (base program) may have **ONE (1) or TWO (2)** depending on their build date; it is acceptable to ship a 2021 Mach-E non-GT with just ONE (1) key fob & key blade dummy for the balance of the 2021 model year.

*Please note that an update to the Loose Content Label to change from "KEY FOB" to "KEY FOBS" will be coming.*

Please contact me should you have any questions.

Kind Regards,
