Smaller Size & Longer Range & Shorter Charging Time

Himiway Big Dog combines the new Samsung/LG battery technology with a 5000mAh single cell capacity—smaller size but larger diversity.

Compared with 3500mAh cells made of nickel, cobalt, and manganese, this 960Wh battery efficiently improves the range, stability, and safety of Himiway bikes.

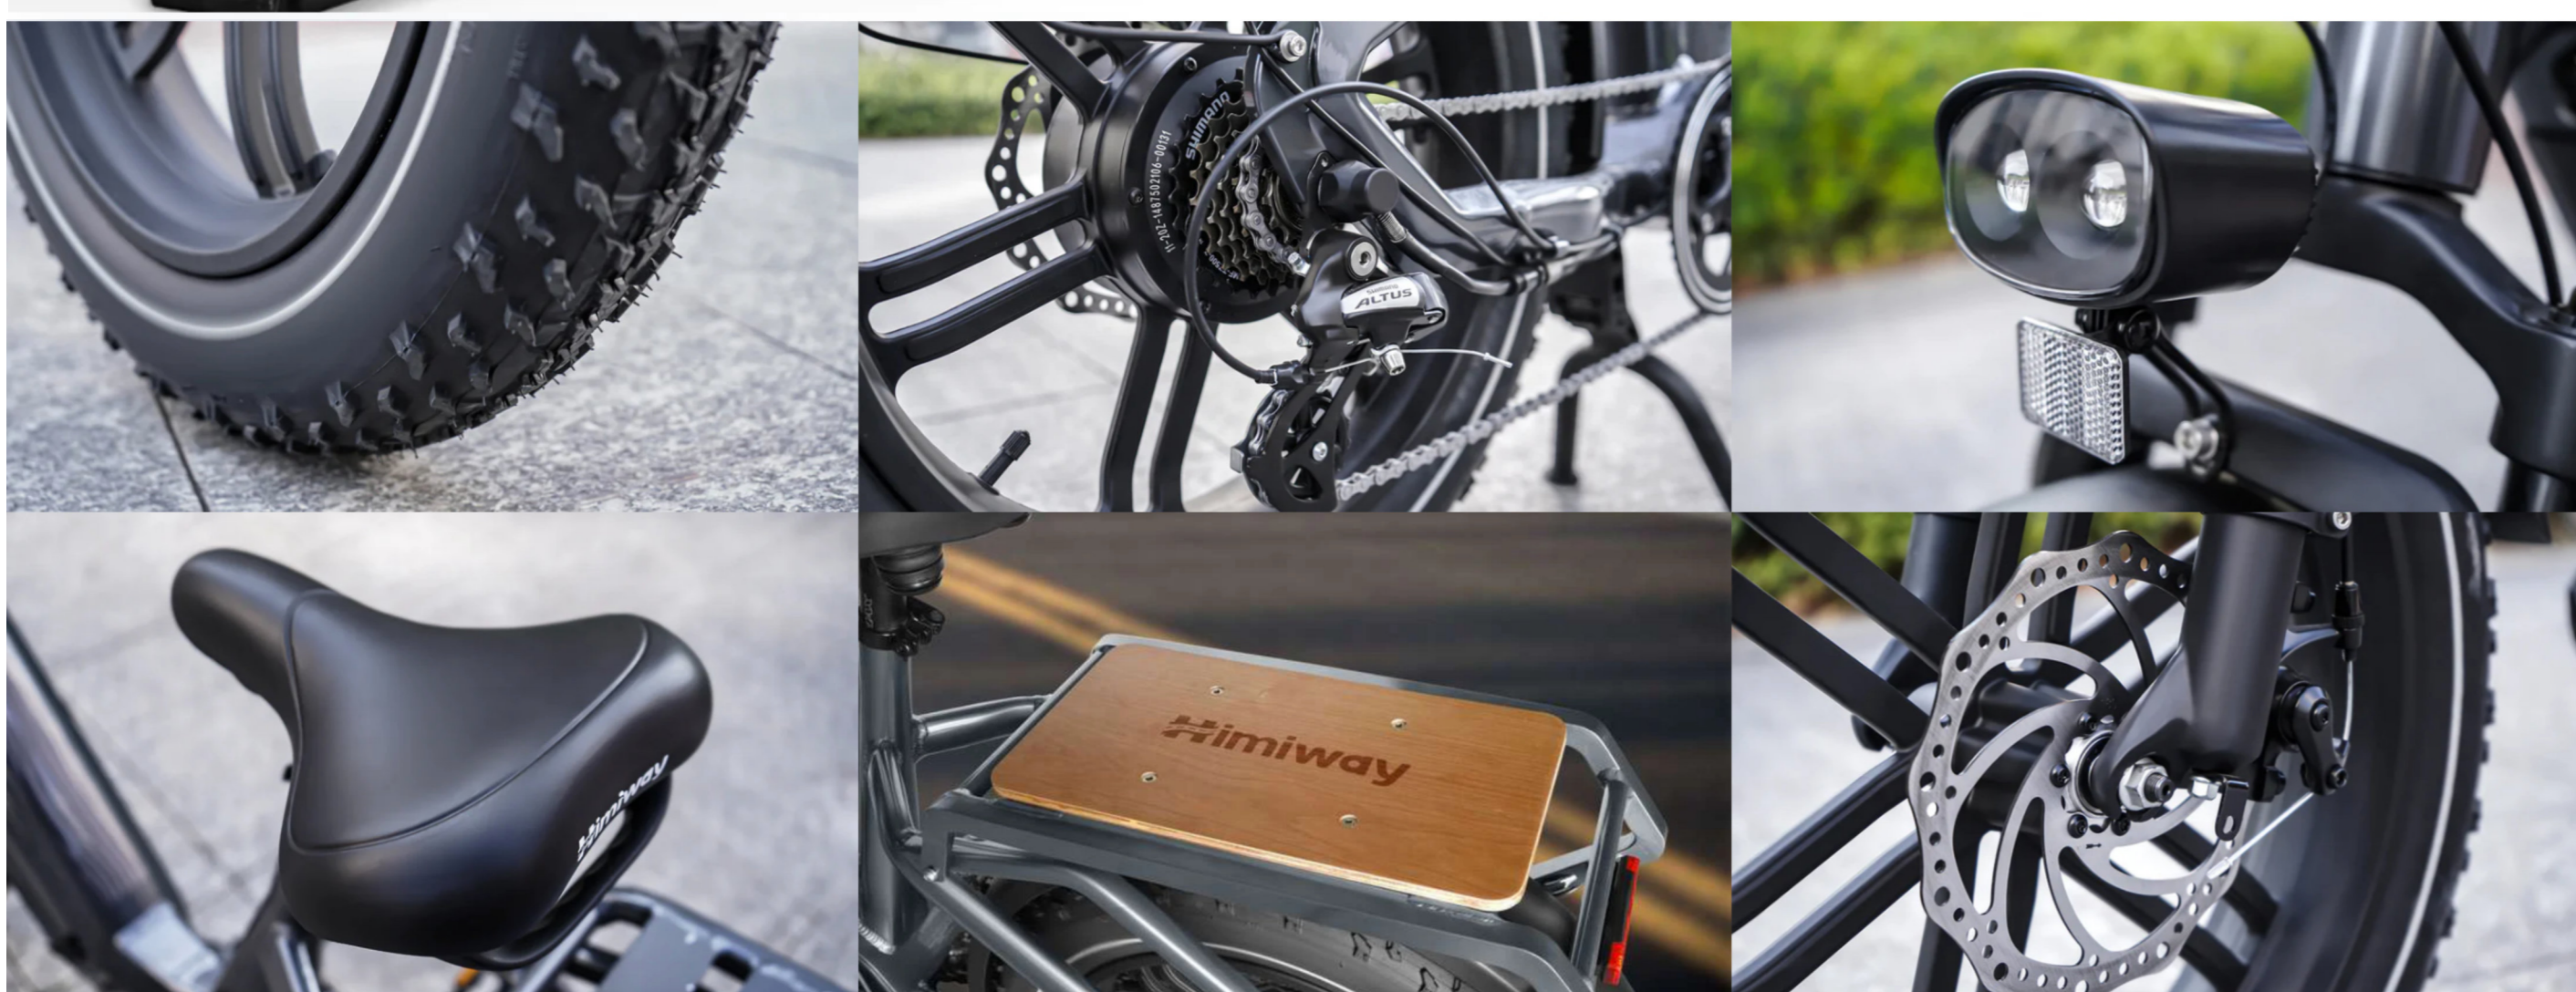

A single charge can last up to 60 miles on pure electric power and over 80+ miles with pedal assist. The battery will maintain 80% capacity after 1000 charges.

60-80 Miles
Per Charge

960 Wh
Total Battery Capacity

5000mAh

7 hours
Time Until Fully Charge

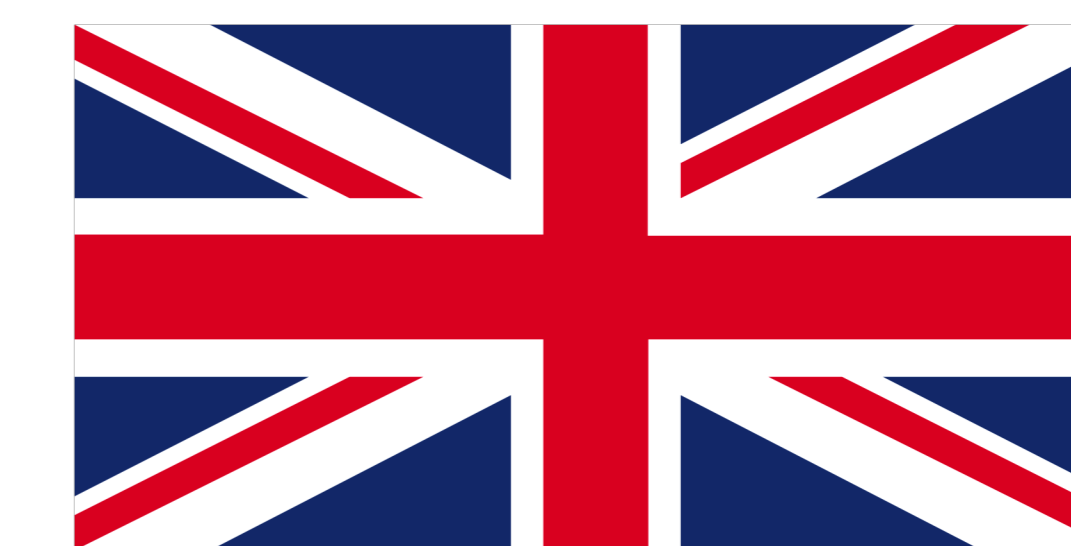

BIG DOG EQUIPS HYDRAULIC BRAKES

Advanced braking performance (improved by up to 40%).
No maintenance required in 3 years if used, decently.
Smoother experience when stop your bike.
Much easier to control and manage the brakes

Extra Diverse, Large, Multifunctional Rear Racks & Fully Integrated Battery Design

The sturdy, multifunctional rear rack carries cargo of all shapes and sizes. The integrated battery design helps maintain capacity and can reduce mechanical failures in even the most extreme weather conditions by up to 95%. **Attention:** Extra Rear Racks are not included in the box

Fast acceleration & Good gradeability & Longer Lifespan

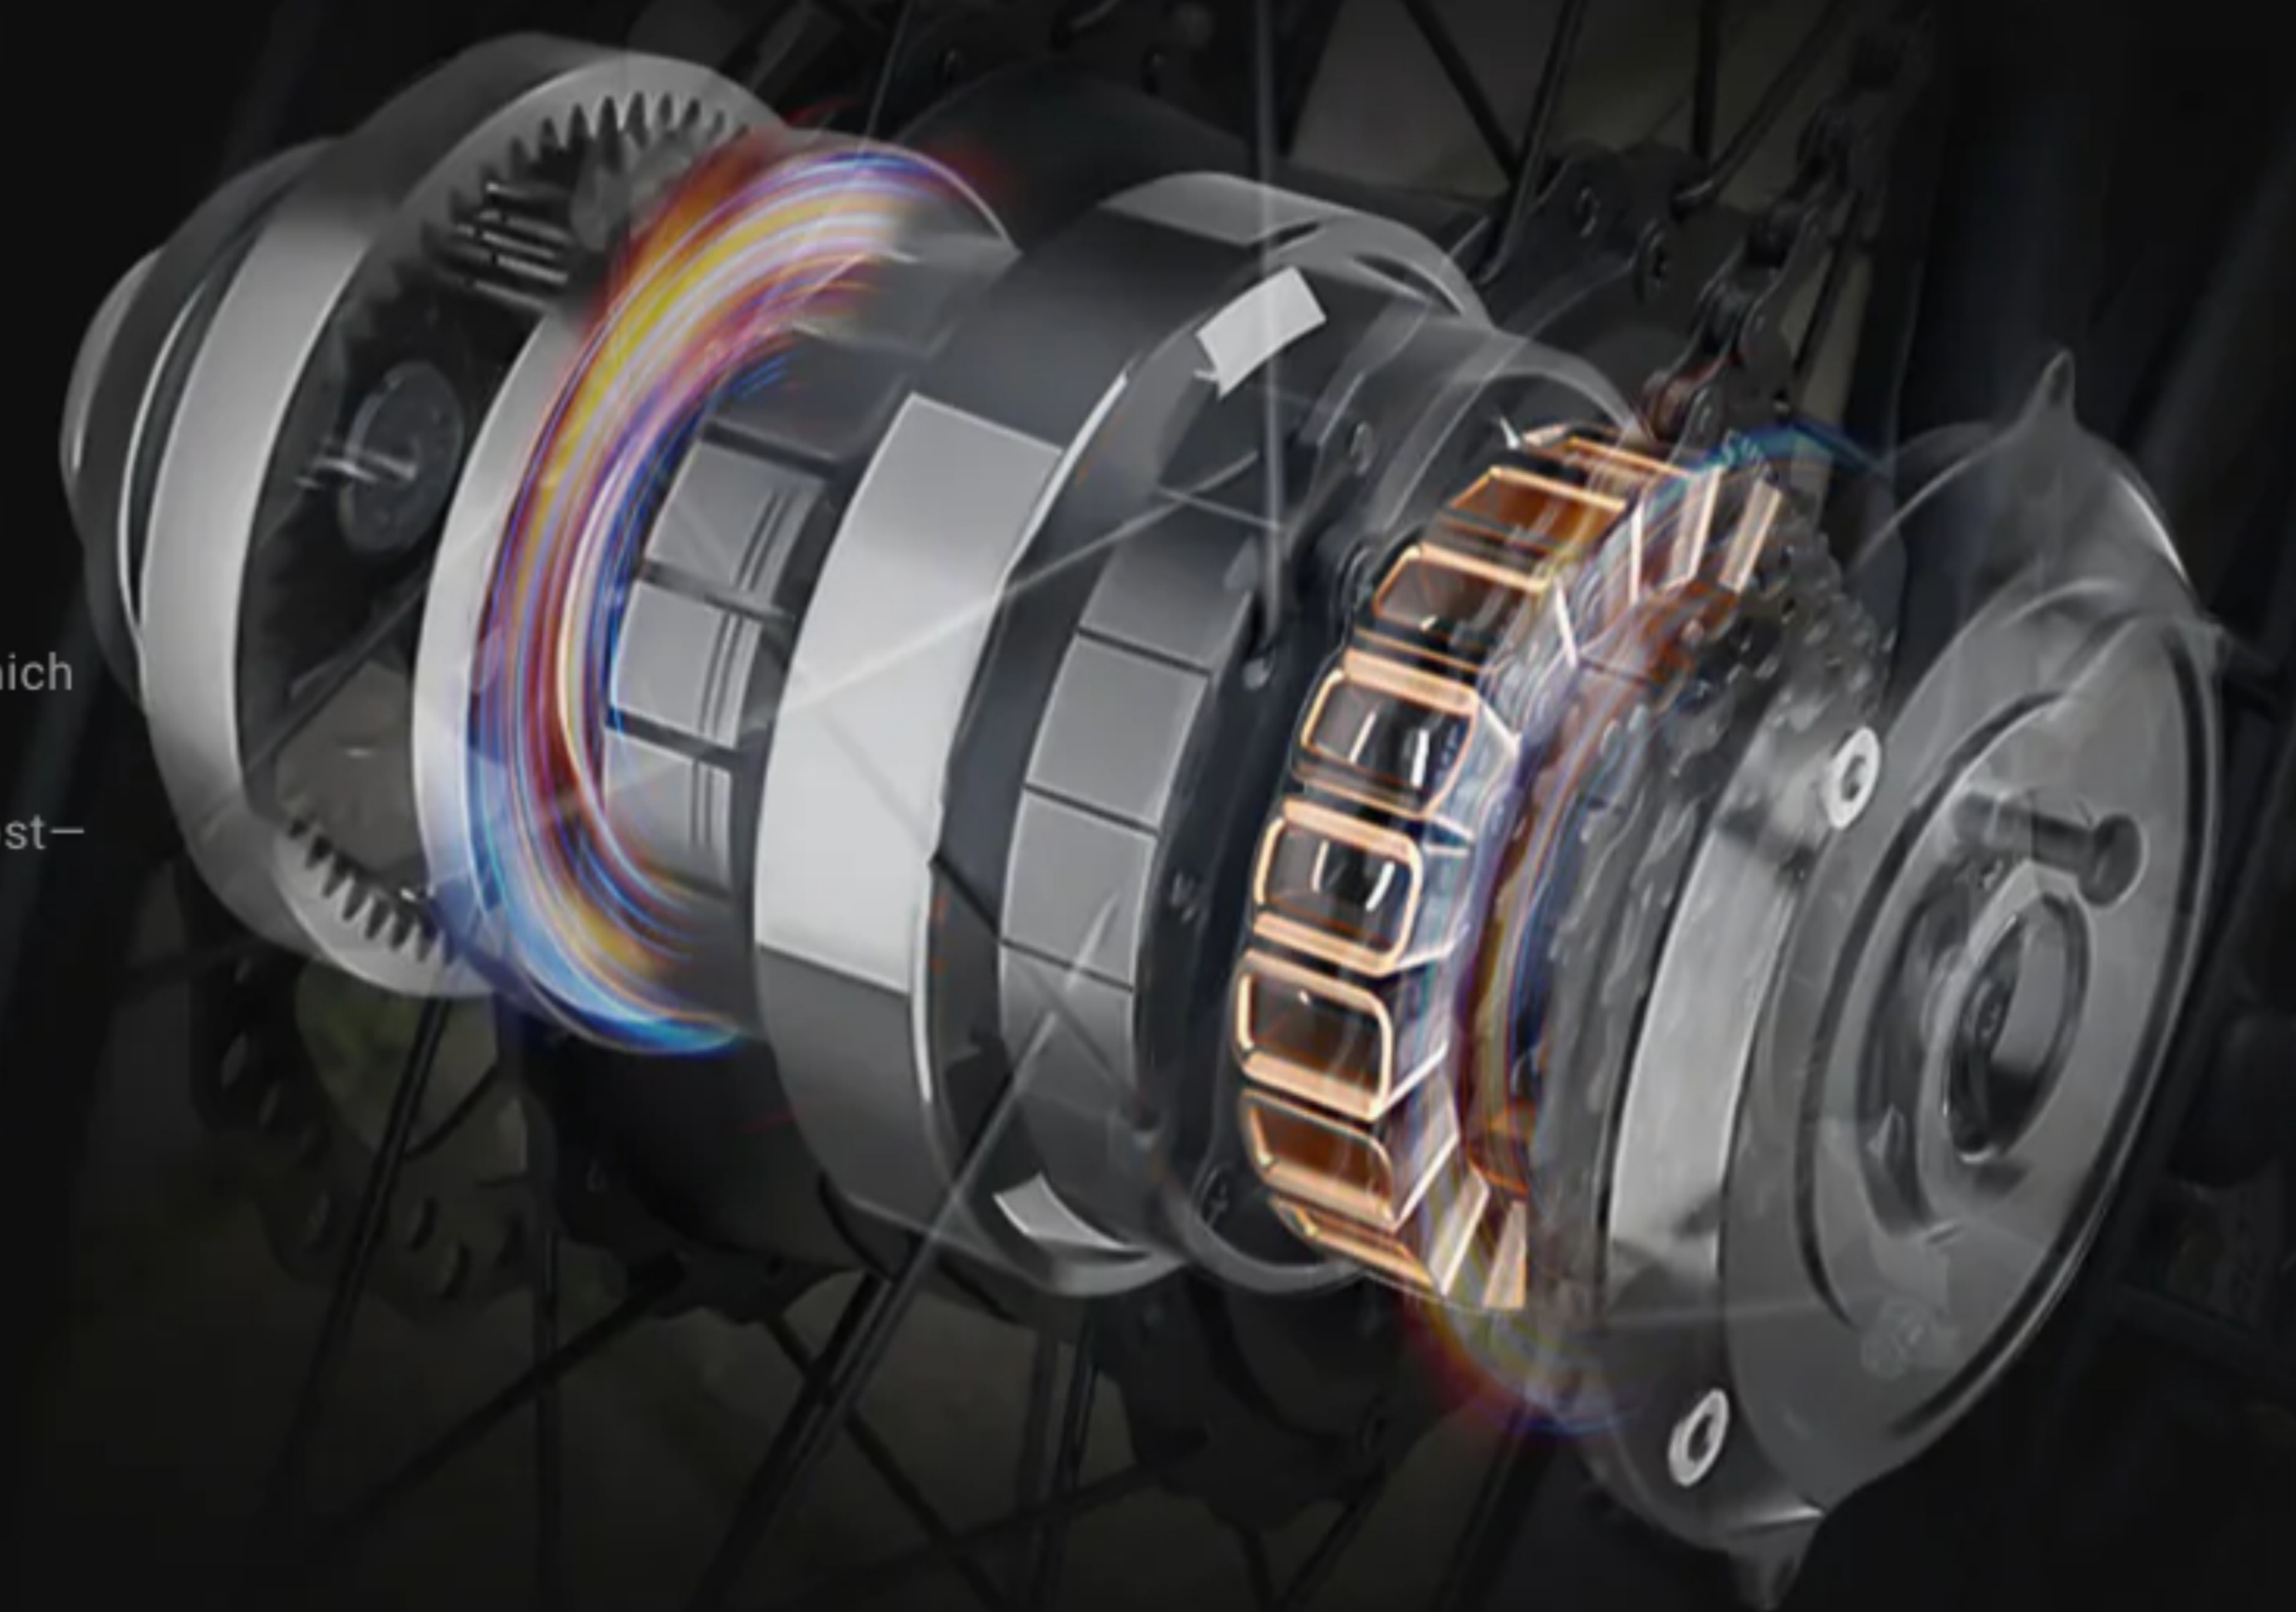

The Big Dog's motor uses an updated and specialized inner ring, which enables high-temperature resistance and better heat dissipation.

This inner ring reduces the motor magnets' attenuation speed, which guarantees longer life expectancy for the motor, meaning your Himiway Big Dog will outlast the competition where it matters most—the power system.

Big Dog's brushless geared hub motor will help you conquer any obstacle in your chosen terrain.
