Product Line

SMB 50

Single Appliance with web management, unit supports 1 PSTN card(Analog or PRI). Appliance has full software capabilities (IVR/Auto attendants, Unified Voicemail and Time of Day Routing). System has single SSD hard drive and single 10/100/1000 ethernet card. System has built-in Fax server for inbound to email fax delivery and user interface for outbound faxing. System is also ready for trunk to trunk dialing for inter-office calling. Designed for customers with less than 50 telephones and less than 10 SIP trunks or 1 PSTN card.

MID 300

1U rack mounted appliance(single or dual post rack) same features as SMB 50 but with added enterprise features(call recording and conference bridge). System has 2 hard drives for redundancy and maximum uptime with dual power supplies. Designed for customers who have 300 or less telephones and 100 SIP trunks or 1 PRI Card. System is also eligible for Cloud Disaster Routing service.

ENT 1000

2U rack mounted appliance(single or dual post rack) and same features as previous models just scales into large enterprise environments. System has dual hard drives(hot swappable) and dual power supplies. Unit is field upgradeable plus hardware layer monitoring. Designed for customers with less than 1000 telephones and less than 250 SIP trunks or 4 PSTN cards. System is also eligible for Cloud Disaster Routing service.
