VoxIP

Emergency Module

Notify with the right message for fast alerts

**Can be added to the VoxIP VOIP system
or a stand alone system**

If you don't have the VoxIP VOIP System you can have the emergency module as a stand alone device integrated into your paging system.

Full Integration Into VoxIP SIP Appliance

Emergency devices register as SIP Endpoints. allows customer to customize emergency notifications that fits the needs of their environments.

Unlimited Panic Buttons in Your Environment

Deploy as many hidden or public panic buttons throughout your environment. Panic buttons can be programmed to call security officers, internal extensions or even make 911 calls.

Utilize Overhead Paging as Bell System

VoxIP VOIP appliance can provide bell schedule services with audible tone or even customizable recordings using your overhead speakers or paging over SIP enabled endpoints (Telephones, etc.).

- Customizable Prerecorded Overhead Messages for Security and Weather Alerts
- Can Replace Overhead Bell System
- Replace Emergency Panel Equipment
- Unlimited Hidden Panic Buttons Across Your Environment
- Devices Connect as SIP Endpoints into VOIP Appliance
- All devices are web manageable
- ADA and OSHA compliance
