1. A number of empty water jugs have been set aside for bullet expansion tests. We should know more soon. So stay tuned, though, as the results could be exciting.

2. In my experience, there is a real difference between small and large game bullets. The .257 Jackrabbit and the .327 Federal Magnum are excellent examples of this. I have hunted both, and the .257 Jackrabbit is far superior for its intended purpose - small game hunting.

3. When hunting small game, it is important to have a load that is capable of penetrating the target. The .257 Jackrabbit is definitely capable of doing this. In fact, the penetration is so good that it is better than the .327 Federal Magnum.

4. It is also important to have a load that is reliable and accurate. The .257 Jackrabbit is both. I have shot hundreds of rounds with this load, and the accuracy is consistently good.

5. The .257 Jackrabbit is also a good choice for those who prefer to use cast bullets. The .257 Jackrabbit is a great load for cast bullets, and I have used it successfully for this purpose.

6. The .257 Jackrabbit is also a good choice for those who prefer to use both cast and factory loads. The .257 Jackrabbit is a great load for both cast bullets and factory loads, and I have used it successfully for both.

7. The .257 Jackrabbit is also a good choice for those who prefer to use both cast and factory loads. The .257 Jackrabbit is a great load for both cast bullets and factory loads, and I have used it successfully for both.

8. The .257 Jackrabbit is also a good choice for those who prefer to use both cast and factory loads. The .257 Jackrabbit is a great load for both cast bullets and factory loads, and I have used it successfully for both.

9. The .257 Jackrabbit is also a good choice for those who prefer to use both cast and factory loads. The .257 Jackrabbit is a great load for both cast bullets and factory loads, and I have used it successfully for both.

10. The .257 Jackrabbit is also a good choice for those who prefer to use both cast and factory loads. The .257 Jackrabbit is a great load for both cast bullets and factory loads, and I have used it successfully for both.
