

LASH EASE™

Volume Building Fiber Mascara

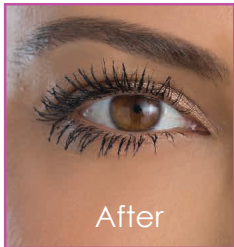

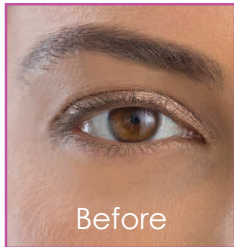

How to Use: Make sure the fiber mascara is spread evenly on the wand before applying to your natural lashes. Start with the wand at the base of your eyelashes and move outwards towards the tips. Work your way across your lash line, focusing the application on the base to help hold the lift! Repeat until desired look is achieved!

Cleaning: To remove Lash Ease™ fiber mascara, simply clean your lashes with warm water and/or your regular eye makeup remover.

Beauty Tips:

- Use an eye curler before using Lash Ease™ fiber mascara to enhance your look!
- Apply multiple coats of Lash Ease™ fiber mascara to volumize your lashes even more!
- Coat both sides of your eyelashes for maximum volume!
