

Natural Action Technologies® Structured Water Unit

Installation Instructions Under the Sink Units Standard Tap Install

This Sink Unit needs to be installed by a qualified person and in accordance with AS 3500 1

1. The Unit may be threaded easily onto a ½' cold water side of the tap.
2. Locate the cold water supply line under the sink. Normally this is on the right side. The Unit will be installed on the COLD water line.
3. Turn off the cold water supply at angle/straight stop valve. Release the water pressure by opening the cold-water tap.
4. Disconnect cold water supply hose from tap assembly and angle valve.
5. Connect each end of the Sink Unit to the ½' end of each flex hose. Hand tighten until snug, and then add ¼ turn more. Unit can be installed in either direction.
6. Route the new Sink Unit to allow easy connections to the tap assembly and the angle/straight stop valve. If necessary, mount the Sink Unit to the back or sidewall of the sink cabinet.
7. Connect the top end of the Sink Unit's flex hose to the cold-water tap by securely hand tightening until snug, plus ¼ turn.
8. Connect the other end of the Sink Unit's flex hose to the angle/straight stop valve, hand tightening until snug, plus ¼ turn.
9. Turn on the water supply and the angle/straight stop valve. Ensure there are no leaks when the tap is open or closed.

You Unit comes pre-wrapped with white plumber's tape, ready for installation. Leave this on for leak-proof operation. Some plumbing fixtures may require additional tape.

The Natural Action Technologies (NAT) limited lifetime warranty coverage of (10) years covers manufacture defects or quality issues. It is also accompanied by a 90 day customer satisfaction guarantee from the date of delivery. The warranty does not include misuse, abuse, sunlight damage, improper installation, freeze damage, natural disaster or blemishes from the manufacturing process. Avoid leaving this Unit in freezing temperatures with residual water inside as impaired function may result.
