

Franklin County Noxious Weed Control Board

Mission Statement

The Franklin County Noxious Weed Control Board strives to serve as responsible stewards by supporting the protection of Franklin County’s natural resources and the preservation of its rich agricultural heritage from the degrading impacts of noxious weeds.

We help landowners, land users and managers, government entities, and the local community comply with the state of Washington’s weed law (RCW 17.10).

We accomplish our mission by:

- ◆ Executing a program emphasizing education in the identification and control of noxious weeds, and encouraging the control of priority species.
- ◆ Providing a trained staff of regulatory inspectors to survey for noxious weeds and work with landowners to formulate reasonable weed control plans compatible with our goals and, when necessary, to require controls.
- ◆ Maintaining a presence in the community by participating in local events, publishing an educational website and printed materials, and conducting regularly scheduled public board meetings.
- ◆ Offering technical assistance to encourage stewardship of natural resources by educating the community on the principles of integrated weed management.

The Franklin County Noxious Weed Control Board’s complete Philosophy and Policy Statements are posted online at fcweedboard.com/board-of-directors.

About The Noxious Weed List

Noxious weeds are certain plant species the state has determined can cause ecological or economic harm.

The Noxious Weed List is updated annually and prioritized into three classes: A, B and C.

Class A Weeds are non-native species whose distribution in Washington is still limited. Preventing new infestations and eradicating existing ones are of the highest priority. Eradication of all Class A species is required by law statewide (RCW 17.10.140).

Class B and Class B-Designate Weeds are non-native species presently limited to portions of the state. In regions where a Class B species is already abundant, control is decided at the local level. A further classification for certain Class B Weeds that occur in regions where they are not yet widespread is a **Class B-Designate**, which requires the prevention of seed production and dispersal of all propagative parts capable of forming a new plant. Preventing new infestations in such areas is a high priority.

Class C Weeds are species that are already widespread in Washington or are of special interest to the state’s agricultural industry. A county weed board may require landowners to control a Class C Weed if it poses a threat to agriculture. Long-term programs of suppression and control are decided at the local level.

***WEED IN TRANSITION:** Kochia is a noxious weed that is intensely managed in portions of Franklin County and selected for increased management efforts in future years countywide.

OUR WEEDS OF FOCUS

Noxious weeds we are actively working on or monitoring to prevent further spread

babysbreath	puncturevine
camelthorn	Ravenna grass
cereal rye	rush skeletonweed
common reed (nonnative genotypes)	saltcedar
Dalmatian toadflax	spikeweed
hoary cress	thistle, Canada
houndstongue	thistle, Scotch
jointed goatgrass	tree-of-heaven
knapweed, diffuse	velvetleaf
knapweed, spotted	white bryony
*kochia	yellow flag iris
longspine sandbur	yellow nutsedge
loosestrife, purple	yellow starthistle
poison hemlock	

Perennial **rush skeletonweed** gained a foothold on thousands of acres in Franklin County while ground was out of wheat production in the Conservation Reserve Program (CRP). Skeletonweed should be controlled on all land that is coming out of CRP before going back into production.

Franklin County 2025 Noxious Weed List

Scotch thistle is a Class B noxious weed in Franklin County and a serious problem in range-land. Single plants can be dug by hand but be sure to destroy the entire root. Large infestations will require herbicide to achieve control.

Dense stands of this spiny plant reduce forage production, prohibiting land utilization for grazing or recreation.

Controlling noxious weeds is the landowner’s responsibility.

Weeds found in Franklin County are in gold font.
