About US :

Al-Mashreq Steel Structures & Oil Pipelines Engineering Co. is a specialized engineering company in the execution of steel structures and oil pipeline projects. The company has established a strong field presence as an approved subcontractor for several private-sector companies operating in the oil and gas industry in Basra

OUR Mission

To deliver reliable and efficient engineering solutions that meet the needs of the oil and gas sector while ensuring full compliance with quality and safety standards

OUR Vision

Al-Mashreq aims to become a leading company in oil engineering and steel structure works in Iraq by delivering high-quality services aligned with international standards and building long-term strategic partnerships

OUR Services

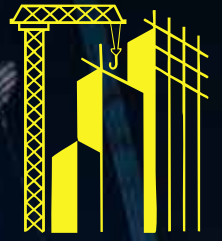

Al-Mashreq provides a comprehensive range of services including:

- Steel structure design and fabrication
- Oil pipeline installation
- Industrial welding (all types)
- Steel material supply and fabrication
- Maintenance and technical support services

01 Steel Materials Supply & Fabrication

Al-Mashreq aims to become a leading company in oil engineering and steel structure works in Iraq by delivering high-quality services aligned with international standards and building long-term strategic partnerships

We are pleased to inform you that Al-Mashreq supplies a wide range of steel materials, particularly I-Beams (IP) and H-Beams (HB), in various sizes and dimensions. These materials are characterized by their high quality and full compliance with technical and engineering standards required in major projects

Why is Al Mashreq chosen for processing iron materials?

The wide variety of available sizes and sections provides great flexibility in meeting the needs of different projects, whether small, medium, or large-scale complex developments.

01

Al-Mashreq ensures the availability of these materials in large quantities with immediate readiness for supply, significantly accelerating project timelines and minimizing delivery delays—an essential factor in oil and construction projects with tight

This service is further supported by the company's integrated logistics system, including transportation and delivery to project sites within oil fields, enhancing execution efficiency and reducing time and effort for clients.

03

In addition, the company adopts a well-calculated and flexible pricing strategy, offering highly competitive

04

Scope of Work

The company primarily operates in major oil fields, especially North and South Rumaila fields, in addition to executing projects across various oil sites. This has provided the company with extensive field experience in demanding environments requiring high precision and strict adherence to safety and quality standards

Oil Pipelines

Steel Structures

Experience

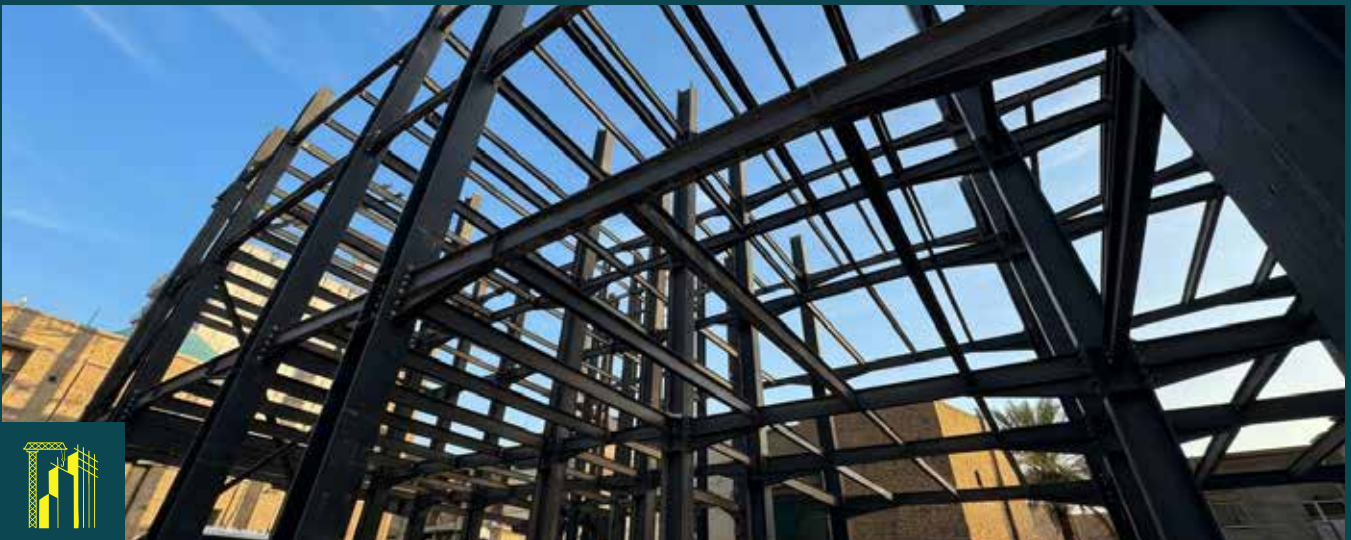

Projects

Al-Mashreq has a proven track record of completed projects in collaboration with well-known private companies, including steel structure fabrication, pipeline installation, welding, and mechanical works.

Key projects include :

01 Pipeline installation project at Station o in North Rumaila for Al-Qubba Engineering Co.

02 Various contracts executed with companies such as Al-Amiri, Al-Nubala, Lamasat, Ras Al Khaimah, and Tariq Al-Tasheed

Reliability & Technical Supervision

The company's projects have been monitored and inspected by international oil companies and major contractors, reflecting a high level of trust in execution quality and professional commitment

Technical & Human Capabilities

Al-Mashreq operates a fully equipped workshop with advanced industrial machinery, including modern welding equipment and fabrication tools, supported by skilled and certified technical personnel

Logistics Capabilities

The company owns a fully integrated transportation system, including trailers and crane trucks, with official security permits for access to oil fields such as North and South Rumaila, ensuring fast execution and reduced delivery time

Competitive Advantages

01 High-speed project execution

02 Competitive pricing with high quality

03 Strong field experience in oil environments

04 Certified welding personnel

05 7/24 emergency operations capability

06 High flexibility in handling major projects

We Are

Built Fast. Built Right. Built to Last

Business Development Certifications

The company aims to strengthen its position by:

01 Documenting projects with reports and visuals

02 Obtaining ISO certifications (45001 & 9001)

03 Implementing HSE systems

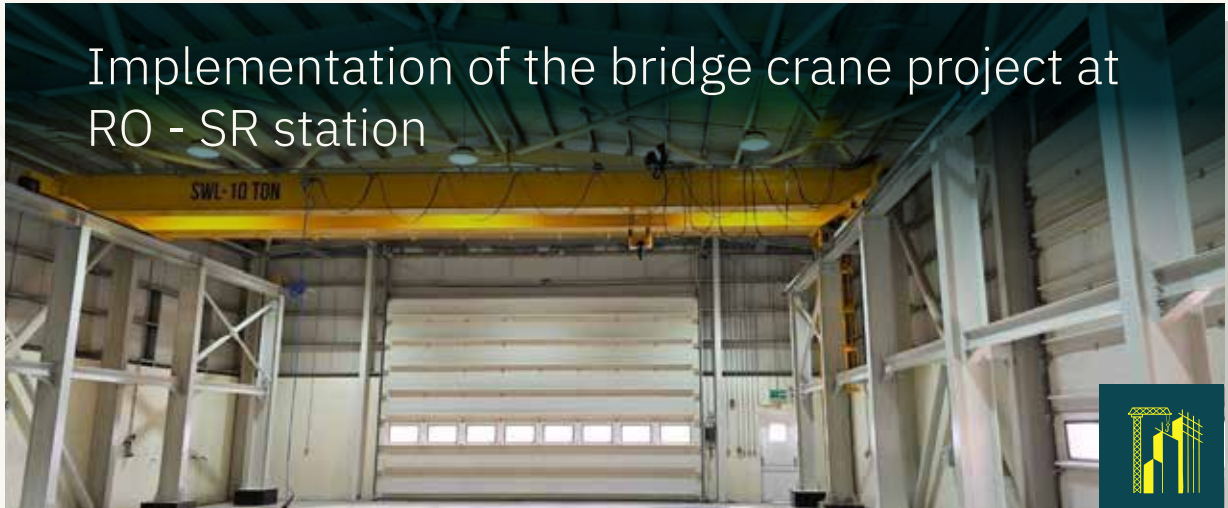

04 Enhancing quotation and technical proposal systems

05 Registering as an approved vendor with international companies

OUR Projects

Implementation of the bridge crane project at RO - SR station

A car parking canopy at Karmat Ali station

Security watch posts constructed by Shawkat Al-Mashriq for Missan Oil Company

OUR Projects

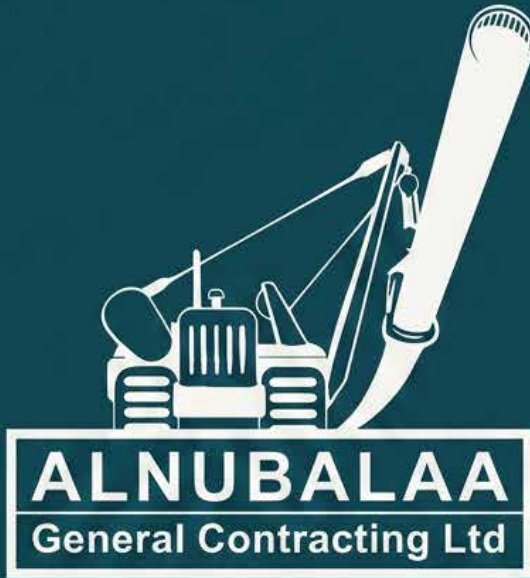

OUR Projects

Receiving important field visits, including:

A visit by TotalEnergies, Al-Amri, CNLC, KBR, Basra Gas Company, and Al-Nubalaa to our workshop.
