Compliance Software & Solutions Group

Company Overview

Compliance Practice

Compliance Software & Solutions Group (CSSG) is a professional services firm that provides experience and delivery excellence to our clients.

We have leveraged our compliance expertise to develop a TJC software platform (Compliance Check+). CSSG developed the Compliance Check+® TJC Software to create a robust platform to support compliance practices consisting: TJC, OSHA, ICD-10, and HIPAA for starters.

"Putting together the pieces to create innovative solutions for our clients."

CSSG is eager to share some approaches that benefit physician practices, payers, hospitals, and health systems to accelerate their TJC compliance efforts.

Compliance Check+ Tool

Compliance Check+ TJC System is designed to facilitate Healthcare Organizations (HCOs) with preparedness for Joint Commission surveys. CSSG comprehensive, enterprise-wide view of compliance solutions provides a unique approach. Compliance Check+ is a web-based tool designed to facilitate Healthcare Organizations with preparedness for Joint Commission surveys. Compliance Check+ TJC System allows HCOs to

- Record, store, share, and distribute supporting documentation to support TJC compliance
- Conduct a complete or partial mock survey allowing for ongoing monitoring of compliance status.

This innovative compliance tool provides the following benefits to the organization:

- Replaces multiple processes
- Tracks both internal or external audits
- Transforms the TJC compliance process

Compliance Check+ TJC System allows healthcare providers to coordinate TJC standards with facility specific documentation, standardized policies and procedures or a combination of both.
