

ONEDECK™

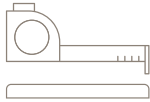

Ultra Premium
PVC Decking

ONE Board.
ONE System.
ONE Deck for Life.

Introducing **OneDeck**, a Simple Sustainable Ultra Premium Decking Solution, Made to Length and Designed to Last.

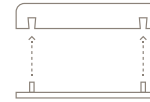

Made to Length Reducing Waste

OneDeck can be made to length at our Australian extrusion facility, reducing waste, simplifying installation, and ensuring every board fits your project perfectly.

Made in Australia for Australian conditions.

Made by Australians for Australians, our scratch and slip resistant, fire-resistant, and moisture-proof solution is the pinnacle of enduring excellence. So you can indulge in a lifetime of outdoor living.

One Board & One System. It's That Simple.

Innovative technology provides a market leading decking finish while simplifying the installation process to just One Board & One System, saving you valuable time and labour.

Leading the War on Waste.

We are turning 10,000s tonnes of PVC waste into a premium, durable, long-lasting and infinitely recyclable decking solution that looks great and is better for the environment.

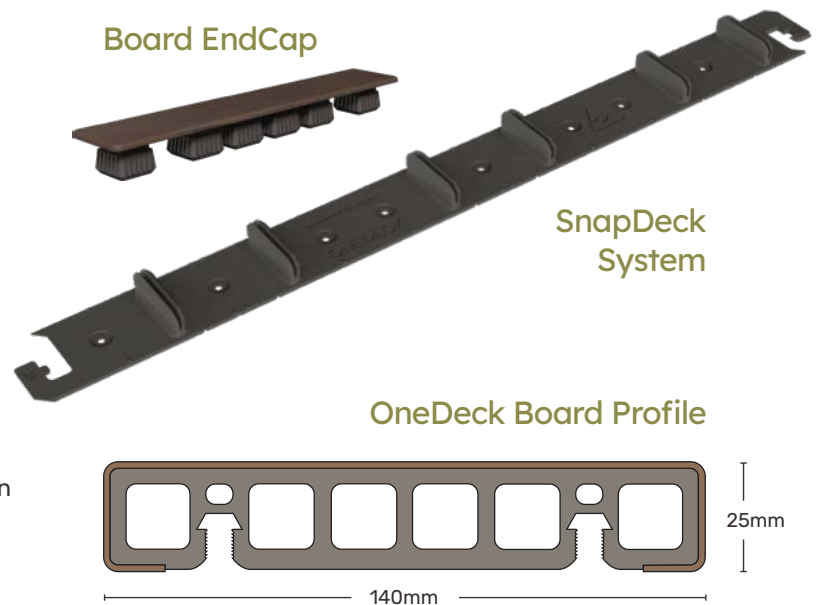

snapDECK[™]
TECHNOLOGY

Revolutionising the Decking Market!

At the heart of OneDeck's innovation is its industry-first patented fixing system - SnapDeck Technology.

This cutting-edge system provides a superior decking finish while simplifying the entire installation process to just One Board & One System, saving our customers valuable time and labour.

The SnapDeck Technology Difference

- ✓ **Closing the Gap.**
Industry leading 3mm decking gap.
- ✓ **No Unsightly Clips or Brackets.**
Completely invisible fixing.
- ✓ **Easy to Install.**
Save up to 25% time on laying deck.
- ✓ **Simple to Buy.**
One fixing for your whole installation.
- ✓ **Pioneering Functionality.**
One fixing that performs multiple purposes.
- ✓ **UV Stability.**
Capping layer that reflects near infrared light.
- ✓ **Keeping Cool.**
Dynamic ventilation chambers promote airflow.

Why Choose ONEDECK™

OneDeck combines over **30 years of experience** with cutting-edge material science to create a smarter, longer-lasting deck.

From advanced UV-stable capping and heat-reflective pigmentation to dynamic ventilation chambers that keep it cooler underfoot, every detail is designed with performance in mind.

Made to length at our Australian extrusion facility, OneDeck reduces waste, simplifies installation, and sets a new standard in outdoor living.

DIY Installation

With our patented SnapDeck Technology, transform your outdoor space swiftly and effortlessly using just One Board & One System.

Moisture Proof

Designed to endure, OneDeck stands resilient against the elements, with moisture proof qualities preventing rot and deformation.

Install On Concrete

Unlike any other decking product, OneDeck can be installed directly onto concrete due to our unique SnapDeck technology.

Fire Resistant

OneDeck's 90% recycled PVC composition offers inherent fire resistance, making it the safest option for your outdoor space, even in areas prone to bushfires.

Keeping Cool

Stays cooler underfoot thanks to dynamic ventilation chambers that promote airflow, combined with advanced pigmentation that reflects heat and sunlight.

UV Stability

We engineered OneDeck's capping layer for superior UV stability—ensuring long-lasting colour, finish, and performance in harsh Australian conditions.

Durable

Built to withstand the Australian outdoors, OneDeck is scratch and fade resistant, and uniquely designed to never swell, backed by a 30-year warranty.

Never Paint Again

Available in a range of finishes, OneDeck's premium board capping maintains its luxurious appearance without the need for yearly painting or sealing.

Non-Slip

Safety comes first with OneDeck's non-slip surface, ensuring secure footing in all outdoor conditions.

Colours Inspired by the Natural Australian Environment.

Ironbark Ember

A deeper, woodier red-brown, inspired by the bark of the Ironbark tree glowing at sunset.

Mallee Bark

Warm and weathered like the peeling bark of the Mallee eucalypt, with hints dry bushlands.

Storm Granite

A rugged, stony grey with depth, like a stormy sky meeting rocky coast.

Saltbush Veil

A silvery, sage-like neutral, reflecting Australia's inland scrubland.

Coastal Sandstone

A soft, golden-beige drawn from windswept cliffs along the Great Ocean Road.

Coastal Spinifex

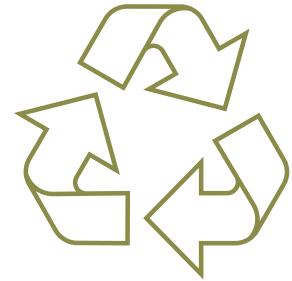

Coastal Spinifex brings breezy, golden texture inspired by Australia's wind-swept dunes.

We don't follow trends – we **question** them.

Thinking Better means reimagining how things are made, using waste as a resource, and refusing to settle for greenwashing.

It's not just better. It's ours.

Saving **10,000s** Tonnes of PVC from Landfill.

OneDeck is made using recycled materials and smart manufacturing, helping divert tens of thousands of tons of waste from landfill—without compromising on quality or performance.

Warranty

Backed by a comprehensive warranty, OneDeck is built to last—engineered for durability, colour retention, and structural integrity in the harshest Australian environments.

Infinitely recyclable

Fully recyclable at the end of its life, OneDeck is part of a circular economy—designed to reduce waste and promote long-term environmental responsibility.

Long Lasting

OneDeck is made to endure. Resistant to fading, cracking, and warping, it delivers long-term performance with minimal maintenance, year after year.

How OneDeck is leading the War On Waste

Where Do We Source Our Recycled PVC From?

OneDeck sources recycled PVC from our sister company, Think Polymer Technologies, committed to sustainable innovation.

Powered by Innovation in Recycling

They transform post-consumer and industrial PVC waste into durable products using CSIRO-developed technology.

Closed-Loop Circularity, Made in Australia

All processing is done locally, ensuring quality and supply chain transparency.

Environmental Benefits That Matter

- Diverts PVC from landfill
- Avoids virgin PVC
- Cuts emissions
- Supports local jobs and innovation

Cutting-Edge Technology Driving Smarter Recycling

At the Heart of Our Recycling Process Our custom-built PVC Analyser, developed over three years with support from CSIRO, revolutionises how we sort and process recycled materials.

Why It Matters

Material Integrity:

Detects additives and contaminants for optimal formulation

Product Consistency:

Ensures reliable performance in every board

Reduced Waste:

Maximizes yield, minimizes landfill

Traceability:

Every batch is logged and verifiable

This innovation sets a new benchmark for sustainable, high-performance building materials.

Manufactured to Length, Reducing Waste

At OneDeck, every board is custom-manufactured to your required length, with an extra 100mm added for trimming and material contraction.

Why Made to Length?

Faster Installations:

Saves time and effort on-site

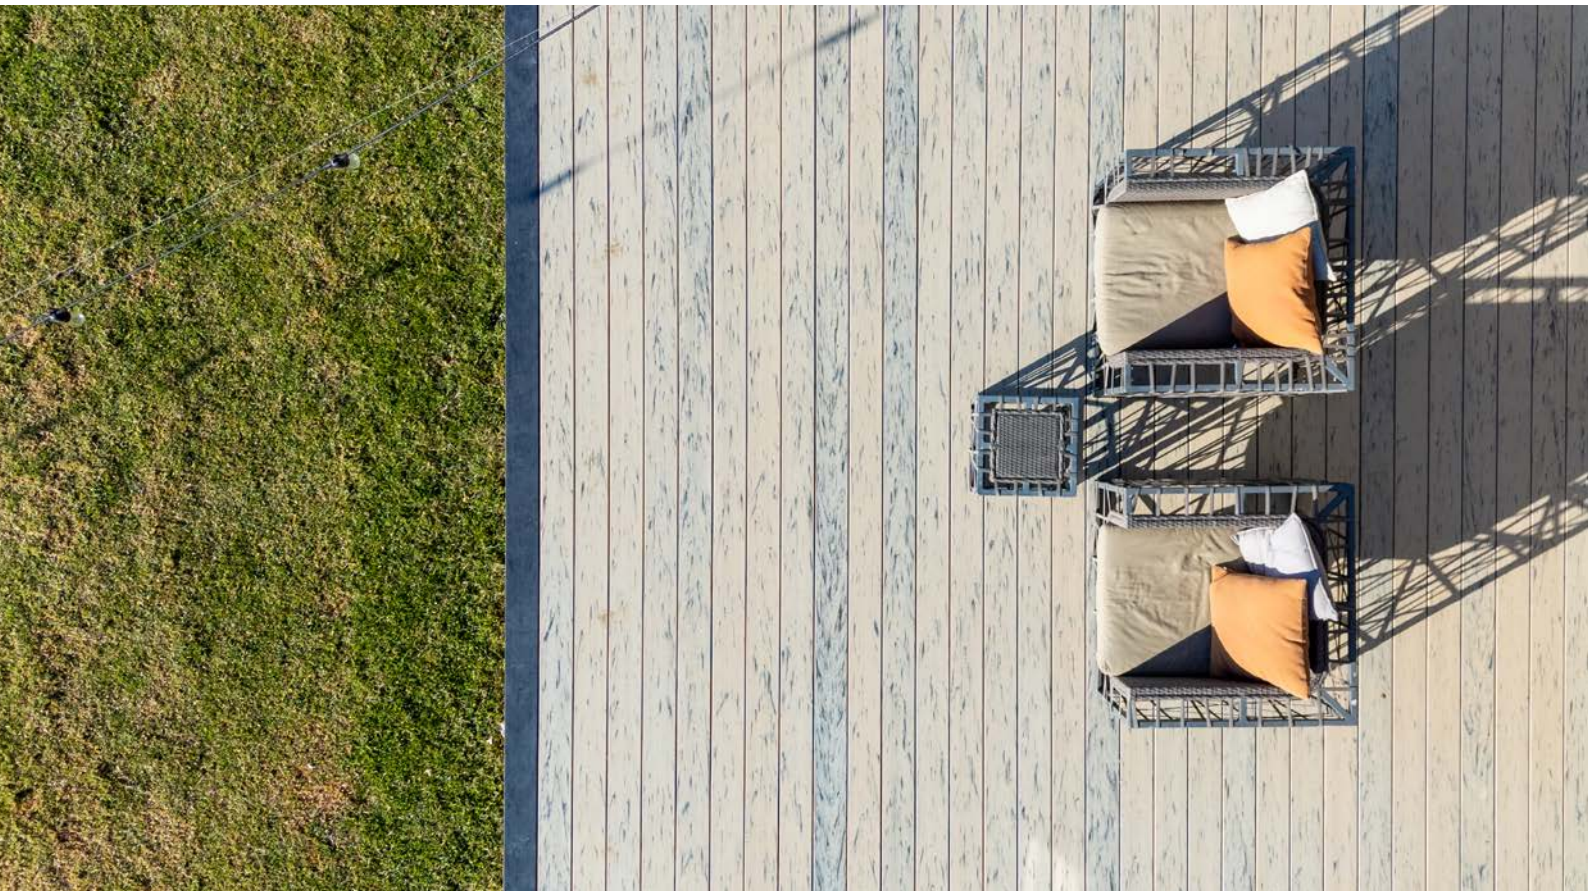

Minimal Waste:

Only order what you need – average decks waste 18%

Smarter Planning:

Simplifies layouts and material estimates

Note: Boards are supplied at your specified length plus 100mm. We recommend trimming both machine-finished ends on-site to achieve a perfect cut and optimal fit for your project.
