## Who We Are

Compotech solution is a trusted wholesale supplier of premium composite decking and cladding materials, proudly serving building material distributors, construction professionals, and landscape designers across the industry. With a deep commitment to innovation and reliability, we deliver high-performance composite solutions that combine the natural aesthetics of timber with the durability and low-maintenance benefits of advanced composite technology.

Our extensive product range includes a variety of textures, finishes, and colours to suit both modern and traditional architectural styles. Whether it's for residential decking, commercial facades, garden landscapes, or large-scale construction projects, our composite materials are engineered to withstand harsh environmental conditions while maintaining their visual appeal and structural integrity over time.

At Compotech Solution, we understand the importance of quality, sustainability, and affordability. Our products are not only eco-friendly—made from recycled materials—but also designed to offer long-term value with minimal upkeep. We work closely with builders, retailers, and project managers to provide tailored solutions, prompt delivery, and dependable customer support.

With a reputation for consistency, integrity, and customer satisfaction, Compotech Solution is your reliable partner for all composite decking and cladding requirements. Whether you're stocking a retail store or managing a major construction project, we are here to help you build better, smarter, and greener.

### Excellent Durability & Weather Resistance

WPC is built to endure harsh weather without cracking, warping, or rotting. Unlike traditional timber, it resists moisture, termites, mold, and UV rays—making it ideal for long-term use in outdoor applications like decking, cladding, and fencing.

### Low Maintenance

Unlike natural wood that requires regular sealing or painting, WPC is easy to clean and resistant to stains and fading. A quick rinse with water and mild soap keeps it looking new, saving both time and maintenance costs.

### Eco-Friendly & Sustainable

Made from recycled wood and plastic, WPC helps reduce landfill waste and conserves natural resources. Its durability means fewer replacements over time, making it a responsible, long-term alternative to timber.

### Attractive & Versatile Design

Available in a variety of colours, textures, and finishes, WPC offers the beauty of real wood with added consistency and strength. It's easy to work with and suitable for modern or classic design styles in both residential and commercial spaces.

# WoodLine Board ( WPC )

## Product Colors

SIZE: 138mm x 23mm

LENGTH: 5.4m

PROFILES: Grooved Board

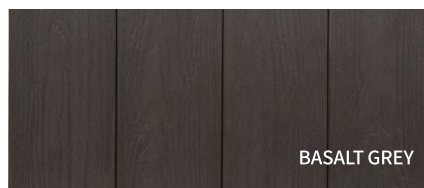

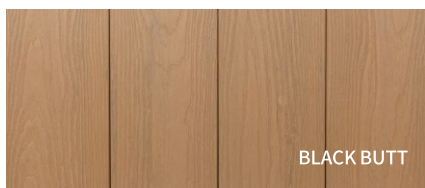

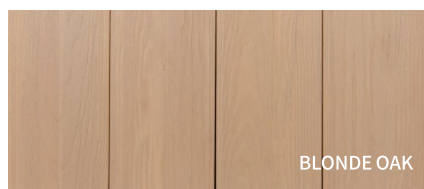

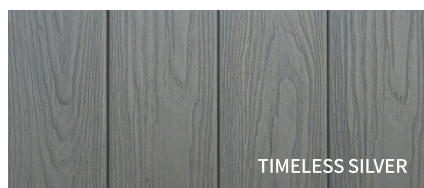

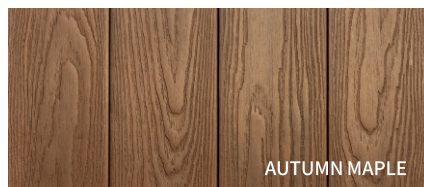

Edge Board

Fascia Board

(180mm X 15mm)

## Low Maintenance

No painting, sealing, or staining required — just occasional cleaning. Enjoy beautiful decking with minimal upkeep.

## Weather & UV Resistant

Built to withstand harsh Australian climates. Our WPC boards won't crack, fade, or warp under sun or rain.

## Eco-Friendly Composition

Made from recycled wood and plastic, our decking offers a sustainable alternative to traditional timber.

## Slip-Resistant Surface

Designed for safety, especially around pools or wet areas, with a textured finish that reduces the risk of slipping.

## Long-Lasting Durability

Resistant to termites, rot, mould, and moisture — ensuring years of reliable performance in outdoor spaces.

## Modern & Natural Aesthetics

Available in a range of stylish colours and woodgrain finishes to suit contemporary Australian architecture.

## Frequently Asked Questions

### How does Compotech perform in full sun or hot weather?

Compotech composite decking is engineered to stay cooler underfoot even in direct sunlight. Its advanced co-extrusion layer offers high UV resistance and thermal stability, ensuring consistent surface temperature and long-term durability.

### Is it slip-resistant? Is it safe around pools or wet areas?

Yes. Compotech decking features a textured surface with high slip resistance, making it ideal for areas exposed to water, such as pools, patios, or docks. It complies with industry safety standards for wet environments.

### Is it scratch-resistant? Is it suitable for homes with pets?

Compotech's co-extruded surface layer offers enhanced scratch resistance. It is designed to withstand moderate impact and abrasion, making it pet-friendly and suitable for high-traffic areas.

### How much does it expand and contract?

Compotech uses high-density materials that minimize expansion and contraction. Proper gapping during installation (typically 3–5mm) allows the boards to perform consistently under temperature changes.

### Is it easy to install?

Yes. Compotech uses a concealed clip system for clean, secure installation. Comprehensive installation guides are available for Compotech Natural Series, Woodline Board product line.

### Can I install it myself, or do I need a professional?

Both options are supported. DIY installation is possible following our guides. For warranty compliance and optimal results, we recommend using a trained or certified installer familiar with Compotech products.

### How do I clean and maintain the boards?

Regular cleaning with a soft broom or mild detergent and water is sufficient. Avoid using harsh chemicals or high-pressure washers above 3000 PSI to preserve the surface.
