WHO WE ARE:

- **Joanna Boey**, owner and inventor of **SMARTFAUCETS, INC.**, has been in the business for **over 5 years**. She developed this patented technology to ensure precise and efficient water usage, tailored for the specific requirements of residential, commercial, and industrial facilities.
- Our dedicated team is accessible round-the-clock to offer expert consultation and support, guiding you through every step of implementing effective water conservation strategies to ensure your system operates at peak efficiency.
- Our SmartFaucets are made from high-quality, corrosion-resistant, and eco-friendly brass, offering durability, reliability, and environmental responsibility with a sleek design.
- SmartFaucets have been lab-tested by IAPMO to handle 550,000 uses without failure, giving them a lifespan of 30 years if used 50 times a day. This makes them one of the most economical and environmentally friendly faucets in the world, saving owners thousands of dollars in both faucet and labor costs, and importantly, benefiting the environment.
- Our smart water-saving solutions deliver exceptional value, reducing water bills and maintenance costs while providing a rapid return on investment. Compliant with new health codes in Las Vegas and hospitals nationwide, they can save \$250 per room annually, in addition to long-term savings on faucet costs, generating strong profit potential locally and globally.
- Another unique feature of SmartFaucets is the auto flush function that ensures compliance with health codes requiring hot water flushing to kill bacteria in unused faucets. This automatic function significantly reduces labor costs in hospitals, enhancing both hygiene and operational productivity.

WHAT WE DO:

WE SPECIALIZE IN SUPPLYING **SMARTFAUCETS:**

- ✓ A touchless sensor faucet powered by a hydroelectric rechargeable battery and equipped with patent-approved technology for preset timer and temperature.
- ✓ Field tested to save 45% water, gas, electric, paper towels & trash.
- ✓ Enhances sanitation and reduces environmental impact. Ideal for hotels, hospitals, nursing homes University housing & restaurants.

OTHER EQUIPMENT AND SUPPLIES:

- Water-Saving Shower Control Devices
- Eco-Friendly Plumbing Fixtures
- Corrosive-Resistant Brass Faucets
- Bathtub Overflow Prevention Devices
- Commercial-Grade Faucets
- Water-Saving Bidet Spray for Cleaning Toilets While Saving Toilet Paper
- Touch-Sensitive Table Lamp with USB & AC, Built-In Alarm Clock
