

GMP Playbook System Overview

Goal and Vision

Goal: Our objective is to provide comprehensive GMP standard operating procedures (SOPs) tailored for the dietary supplement, cosmetics, and hemp industries. These SOPs adhere to FDA regulations and have been verified to successfully pass GMP certification inspections.

Vision: Our vision is to provide a virtual consulting service bundled with Word documents within a three-month timeframe at an affordable rate.

The Problem

- Consultants often charge high rates (around \$150-\$300/hr.) and may unnecessarily complicate GMP Quality Systems.
- When consultants establish a Quality system, it often unravels over time due to lack of commitment from company employees.
- Many individuals in the industry lack extensive GMP expertise.
- Obtaining GMP certification is a prudent business move to ensure compliance with regulations and provide customers with the safest and highest quality products.

Unique Advantage

- We can swiftly and effectively implement our services at a fixed price.
- We offer a comprehensive outline covering all requirements for achieving GMP certification, including SOPs, specifications, organizational charts, process flowcharts, and more.
- Our package includes editable Word documents that can be tailored to suit your specific needs and circumstances.

Target Audience *(Small to Medium Scale)*

- Dietary supplement facility
- Cosmetic facility
- Hemp facility
- Contract Manufacturer facility
- Own Label \ Private Label Distributor

The Solution

- We provide a ready-to-use Quality system utilizing Smartsheet alongside Word documents.
- Our service entails the complete implementation of a GMP Quality system within a fixed three-month timeframe at a single price.
- Included in our package are weekly one-hour Zoom meetings over three months.
- Additionally, we offer ongoing email support for the subsequent nine months.

Evidence of Success

- Our system has been successfully implemented with seven (7) companies, leading to the completion of nine (9) GMP certifications.
- We have collaborated with renowned GMP certification companies such as Eurofins, SGS, BSI, FoodChain ID, and Perry Johnson (recommended).
