We are able to supply wide range of top-quality products that complied with international standards & certifications, made by extremely reputable manufacturers and offered at highly competitive price.

Take a look into information about one of our products. **Need more details?** Contact us at sales@ajfast.com

DOME WIRE COIL NAILS

Dome Wire Coil nails, when looking at the coil of nails, conical nails will be layered from the outside of the coil towards the center, creating a 'Cone', or domed shape. In such a coil the nails are layered from the outside of the coil to its center to form a cone. These coils are used in specially adapted cone coil nail guns. Using the wrong kind of coil in such a nail gun might lead to jamming, misfire, or even an injury. Conical coil nails are welded together by two thin wire strips at a slanted 15-degree angle.
