We are able to supply wide range of top-quality products that complied with international standards & certifications, made by extremely reputable manufacturers and offered at highly competitive price.

Take a look into information about one of our products. **Need more details?** Contact us at sales@ajfast.com

WIRE COIL NAILS

Coil nails are a series of nails arranged in a circle connected by a piece of metal and loaded into a gun. However, the metal piece isn't the only type of collation for coil nails. More specifically, coil nails can be classified according to their types of collation, types of screw head, and types of screw shank.

Coiled nails refer to nails which are assembled together in coils by steel wires, hence the name wire collated nails. Main types include coiled smooth shank nails, coiled ring shank nails and coiled screw nails.
