

Art Against All

Art by Eurydice Eve Collection

14 December 2025

Eurydice Eve has been a prominent feminist avant garde artist and writer for twenty years. In galleries and museums worldwide, she has exhibited her tapestries and collages--large scale wall hangings of seductive and confrontational female forms, violently hacked at with scissors, stitched together with the hand-dyed thread of feminine embroidery. Eurydice's iconic hand-stitched art bridges high and low aesthetics in an ecstasy of satire and social critique. Eurydice says her artwork is committed to "the age-old tension between the natural flesh we inhabit and the social constructs we make about it; between the bodies we are and the marks we make to capture them." With a nod to dowries, doilies, and temple art, Eurydice Eve works at the intersection of mythology, pop culture, and memory, bridging her Eastern and Western heritages. Eurydice's work connects the viewer with past generations of silenced women for whom she hopes to speak and links the language of culture with the pulse of nature.
