

08/08/2024

Dear Patient,

We would like to inform you that, starting September 1st, we will be making changes to our prescribing practices. Specifically, we will no longer be filling prescriptions for certain medications without a prior evaluation by a specialist. This change applies to:

1. Patients who are prescribed **more than** two controlled substances.
2. Patients who are prescribed a total of **more than** 40 mg of Adderall per day.
3. Patients who are prescribed a total of **more than** 2 mg of Ativan and/or Xanax per day.

This policy is being implemented to ensure that all patients receiving these medications receive the appropriate specialist care and oversight. Thank you for your understanding and cooperation as we implement these changes to better manage your care.

If you have any questions or concerns, please feel free to contact our office.

Sincerely,

Quasar Health Solutions
