

ViuTracker G1

BUILT WITH  ANALOG DEVICES

Product Features

- Smart-size and light-weight
- Real-time and high accuracy auto-tracking
- Compatibility with a wide variation of flight controllers
- Up to 3GHz frequency supported

Product Parameters

Parameter	Indicator
Yaw stability enhancement accuracy	<0.5°
Pitch stability enhancement accuracy	<0.1°
Yaw rotation range	Unlimited
Pitch rotation range	-15°~135°
Maximum horizontal turning rate	300°/s
Maximum vertical turning rate	60°/s
Weight	9kg
Maximum torque	300 N.cm
Input voltage	DC 18V~26V
Average power consumption	15W
Working temperature	-20°C~60°C
IP level	65
Working humidity	20%~70%
Interface	Ethernet, Serial, S.BUS
Supported protocol	MavLink, NMEA-0183
