
BOOKSGUIDE WEBSITE

OBJECTIVE

- To give the knowledge and information about books to end users.
- To get detailed information about books which can be purchased from Amazon Website.
- To provide free study material.

DESCRIPTION

- So firstly, after visiting the website, user needs to create an account before accessing the website, after that user needs to login with Gmail and Password.
- Once the account is created user get access to the homepage.
- On the access page there are two option (books and study material) user can select their option as per requirement.
- In 1st section -
- After selecting books, the logo of different types of books will be presented, through that user get to know the types of books and can select the books accordingly.
- To order the books, user want to click on purchase now, so user gets the option to payment getaway and user can pay by selecting various option.
- In 2nd section -
- After selecting study material, the user gets easy access of syllabus, notes, lab book, practical slips, question bank, question paper, project guidelines, audio lectures and video lectures.
- Right now, in our website the available stream is available i.e. BBA, BBA(CA), BSC(CS).

- In last feedback form attached, in that one QR Code and also one link includes to access the feedback form, the benefit of that feedback form is user can give their own suggestion and their own opinions to BooksGuide website.
