

OUR PROCESS

1 DISCOVERY

How many store locations do you currently operate? Is there an existing scanner that you would like to use in conjunction with your new solution? Do your customers take advantage of self-service offerings such as ProLink? These are all examples of questions that we will ask in order to get to know you and your business. Curious about our solution offerings? You can sign up for one of our monthly **Live Information Sessions!**

DEMO 2

We schedule time with you and your team to walk you through the ins and outs of your chosen solution, giving you a detailed view of how the software works and providing you a chance to ask the questions that will help us tailor the system to your own unique needs.

3 ONBOARDING AND IMPLEMENTATION

Once you've decided that Paperless Solutions is the right software partner for you, we get the ball rolling by sending an email with additional follow-up questions that will help our Implementation Team assist you with a smooth transition. This will then be followed by one or more phone calls to guide you through the process and set up any required scanners or other devices.

TRAINING 4

Receive training either remotely or in-person. Our team knows that the sooner you and your employees are proficient with your new solution, the sooner your business will be able to receive a return on investment. Training will help you maximize the benefits of our software for your business.

5 POST GO-LIVE SUPPORT

Your system will be thoroughly tested prior to going live, but in the event that you experience any concerns our dedicated Autovation Support Team will only be a click or a call away. As a member of the Paperless Solutions family, you will also receive monthly Tech Tips to help you get the most out of your investment.

Are you ready to take your first step? **Contact Us!**
