VEMP POWER TECHNICAL SERVICES L.L.C

The Technology Company

INTRODUCTION

We would like to introduce our team as a part of the VEMP POWER TECHNICAL SERVICES LLC, Through joint ventures with its principles MAX MECHANICAL SERVICES LLC which has a reputation of being one of the leading service oriented business establishments in the U. A. E. The name of the group and its services has been synonymous with the attributes of quality & reliability.

VEMP POWER TECHNICAL, recognizing the needs, challenges and growing demand of Building Automation and Energy Conservation have been contributing to nation building through the introduction of various new technologies to UAE. VEMP POWER has been able to introduce energy efficient central water heating, water cooling systems, steam boilers, solar lighting and solar water heating systems etc.

A new technology that we are involved with is the exciting energy efficient heat pumps and high efficient Swimming pool heating & cooling systems. We are pleased to announce our appointment as the exclusive agents for sales, distribution, and maintenance of these energy efficient water -heating & water-cooling systems.

A further development that we are involved with in the present are the energy efficient low power LED lighting system solutions. These are retrofit lights to replace the current and aging CFL or incandescent bulbs. With a life of over 100,000 hrs and longer warranties these make a ideal future for low power lighting.

About Us

Since its inception, VEMP POWER has shown a steady growth and diversified its activities of specialized energy conservation products to the construction industry. The company diversification is demonstrated by the various types of projects executed over the years. The following are some of the areas covered by us.

- ❖ Energy recovery water heating and cooling projects.
- ❖ LED lighting and Solar lighting projects.
- ❖ Energy efficient swimming pool heating and cooling projects.
- ❖ Air-conditioning, Ventilations & Water Filtrations projects.
- ❖ Plumbing & Sanitary projects.
- ❖ Carpentry, Flooring & False-ceiling gypsum partition works.

VEMP POWER resources and close association with its principle partners enable us to carryout turnkey projects and have been credited with successfully executing a number of energy recovery projects on a design and build basis to the entire satisfaction of the clients. Our sound financial background is demonstrated in terms of the projects executed over the past years of service.

Our Achievements

In its mission to provide a quality technologically advanced solution to its clients, VEMP POWER has always associated its name with international partners and products manufactured in accordance to the international quality and manufacturing codes. We intend to continue our growth through quality products and remain in the forefront of the market in the energy conservation sector.

Range Of Systems Offered

Solar Water Heating Systems

Central Solar Water Heating System – for Residential and Commercial Complexes.
Solar Garden LED Lighting systems – for home and street lighting.

Solar Pv Power Generation Systems

Solar Power Generation PV Systems – for Grid and Off Grid Power requirements.

Cool Pump Water Cooling Systems

Central Water Cooling System – for Residential Complexes.
Central Water Cooling System – for Hotel's, Luxury Apartments Complexes

Swimming Pool Water Heating / Cooling Systems

Pool Water Heating /Cooling System – for Residential Complexes.
Pool Water Heating /Cooling System – for Hotel's, Luxury Apartments Complexes.

Water Filtration systems

Multimedia Filtration System - for Residential Hotel's, Luxury Apartments Complexes.
Water Softeners, RO System- for Residential Hotel's & Industrial Complexes.
Deionizing Plants, Dosing System & All Related Water Treatment Chemicals

All Types MEP Works

AC/Electrical/Plumbing/False Ceiling Gypsum/Painting/Tile Flooring &
All, Related Civil Works & Steel Structure Fabrication Erection Works
