Capabilities Statement

Company Overview

Founded in 2020, Agisoft Solutions LLC is a Minority Owned, Small Disadvantaged Business (SDB) that specializes in Agile Transformation for large-scale programs and organizations. We tailor and implement a unique solution for each product and/or service that increases your Agile maturity, ensures faster product delivery while maintaining quality, and ultimately provides cost savings.

Mission

We provide top-quality consulting services and IT operations support. Understanding client and program specific needs and tailoring the best methodology for implementation, while maintaining software quality through the development lifecycle, allows us to provide agile transformations and thorough delivery services. Our clients are our number one priority, and we ensure that all product needs are met through our collaboration and engineering.

What Sets Us Apart

We combine large-scale Agile transformations with holistically tailored toolset configurations. This enables predictable program delivery through efficient and consistent product and service delivery.

We measure program delivery data (OKRs, KPIs, SLAs) through quantitative and qualitative metrics, leveraging automated calculations. Additionally, we create dashboards and information radiators to provide complete program transparency.

We are both a service and product provider, who have engineered products that help organizations complete the ultimate transformation and delivery.

Proven Metrics

Release Quality
- DOD – 99.13% Defect Free Software Releases
- DHS – 99% Defect Free Software Releases

Delivery Velocity
- DOD – Increase 63%
- DHS – Increase 8%
- FRB – Increase 64%

O&M and AWS Cost Reduction
- DHS
  - 19% O&M
  - 22% AWS

Software Development Cost
- DOD – 44% Reduction of Cost per Story Point
- DHS – 23% Reduction of Cost per Story Point

Agile Maturity
- FRB – 74% Increase

Committed vs. Delivered Content
- DOD and FRB – Higher alignment of Committed Work vs. Delivered Work
- DHS – Content Spread balance between functional requirements, non-functional, spikes

Past Performance

Customs and Border Protection - Border Enforcement Applications for Government Leading Edge IT (BEAGLE)

- Led the largest Agile software development program in the government space; awarded 8-year, $2+ billion contract with the Department of Homeland Security
- Standardized and scaled 60 scrum teams (700 employees), within five portfolios
- Executed Agile-at-Scale methodology and continuously received perfect 5.0 on CPARS reports

Defense Advanced Research Projects Agency – No Manning Required Ship (NOMARS)

- Implemented Agile-at-Scale model for program teams and facilitated long-term planning that ultimately led to a successful launch of the vessel; awarded 3-year, $68 million contract with the Department of Defense
- Configured and customized toolset for program coordination and delivery

Federal Reserve Board – Agile Transformation Support

- Conducted enterprise transformation support through the Lean Agile Center of Excellence (LACE) for the IT, Management, and Financial Management divisions
- Implemented Agile-at-Scale model and assessed Agile maturity at the team and enterprise levels
