

## SPECIAL PURPOSE PROBE ASSEMBLIES

### TYPE PW

#### Clamp-on Water Temp Sensor

- For use in pool/spa and solar water heaters.
- Allows for direct insertion in PVC water pipes.
- Typically mounted with Stainless Steel hose clamp.
- Fast thermal response time with reduced stem effect.
- Specify NTC Thermistor element, wire or cable length.

### TYPE SS

#### Swaged end Stainless Steel

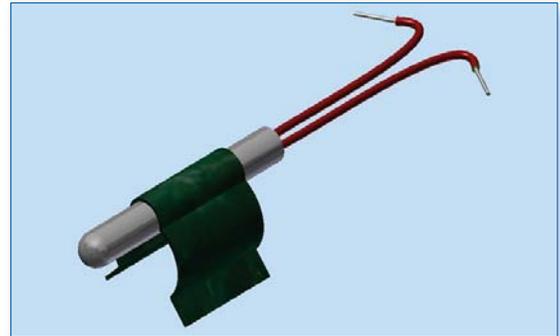

- Used extensively in HVAC/R applications.
- Swaged end provides moisture seal with superior strain relief.
- Available with 3/16" and 1/4" tubes.
- Fast thermal response time.
- Excellent freeze / thaw and vibration resistance.
- Specify NTC Thermistor and cable color / length.

### TYPE CC

#### Clip-On on Pipe Mount

- Used for direct mount of sensor on copper piping with tube diameters from 3/16 inch to 7/8 inch.
- Clip designs for both 3/16 inch and 1/4 inch sensor housings.
- Simple to install. Fast thermal response time.
- Specify NTC Thermistor and cable color / length.

### TYPE XJ

#### Integrated connector assembly

- Rugged sensor assembly with integral modular connector.
- Typically used for Industrial Controls with standard modular cable assemblies.
- Wide variety of housings and connectors.
- Can be supplied with thermistor RTD or digital sensing elements
