

*Cutting life

SIGNaTuRe

the metal industry

Strong and resilient. Precise and robust. This describes our high-performance knives for the metal industry.

- Shear Knives
- Slitting Knives
- Metal Spacer
- Rubberized Spacer
- Plastic Shim
- Separator Disc

We manufacture, repair, and sharpen these types of knives according to your requirements.

Every alloy and heat treatment has its most suitable application:

- D3 | 1.2080 | SKD1
- D2 | 1.2379 | SKD11
- H13 | 1.2344 | SKD61

The right grade and technical specifications, such as parallelism and tolerance, are enormously important in the metallurgy sector.

The toughness and cutting quality of our knives make them the perfect complement to your shears for cutting sheet or galvanized steel, brass, copper, or any other non-ferrous metal, bringing safety, speed, and precision to your production processes.
