

## Recycling: plastics, metal, rubber....

Power, resilience, and robustness—these are the hallmarks of SIGNaTuRe's high-performance knives designed for various subsectors within the recycling industry, including:

- **Granulator knives**
- **Shredding knives**
- **Pelletizer knives**
- **Fly & Bed Knives**
- **Rotar and Stator Knives**

Our steel blades exhibit exceptional resistance to wear and tear and come in the following grades:

- **D3 | 1.2080 | SKD1**
- **D2 | 1.2379 | SKD11**
- **HS | 1.3343 | SKH51**

For exceptionally abrasive materials, we offer knives with a heavy metal insert (tungsten carbide), all of which deliver peak performance in grinding metal, natural or synthetic waste.

Whether it's domestic electrical appliances, electronic scrap, cables, leather, textiles, wood, cellulose, paper, cardboard, tires, cans, sheet metal, plastics, or fine granules—regardless of the waste type, we've developed the perfect cutting tools to handle it.

Beyond our diverse range of models and grades, we provide tailored technical support to every client, empowering them to transform and optimize the planet's resources with the most efficient and productive solutions.
