

SIGNaTuRe

the corrugation industry

SIGNaTuRe is a professional manufacturer of corrugated knives. We offer a wide range of cutting blades, including thin blades, single-edged blades, and toothed cutters.

Our product lineup includes:

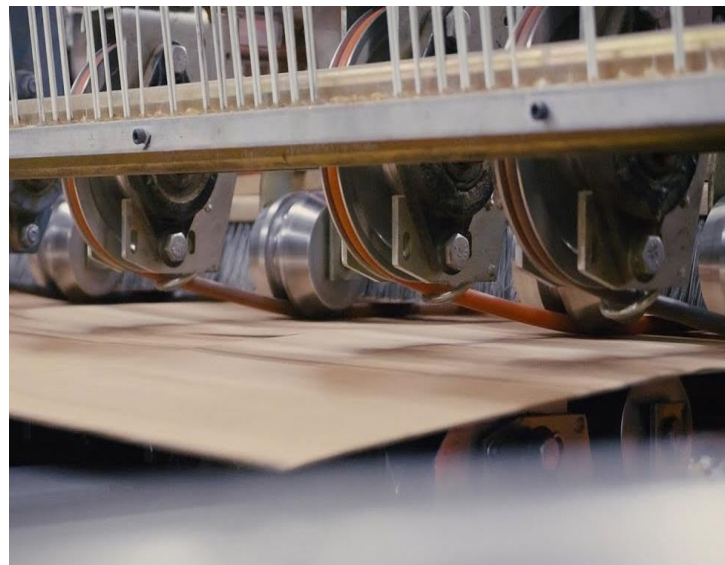

- **Slotter knives**
- **Thin Blades**
- **Sheeter Knives**

We specialize in the manufacture, repair, and sharpening of these types of cutting blades.

Every alloy and heat treatment has its most suitable application:

- **D3 | 1.2080 | SKD1**
- **D2 | 1.2379 | SKD11**
- **Carbide material**

Selecting the right grade and meeting technical specifications such as parallelism and tolerance is of paramount importance in the metallurgy sector.

Our corrugated knives are produced in strict accordance with national quality standards. Our forged steel products exhibit a compact internal structure and excellent crystalline phase. We take special care to prevent quenching cracks and other defects during the heat treatment process, thereby extending the service life of our slotter blades.
