

NEW LIFE GLOBAL MISSIONS

OUR PROGRAM

We offer medical internship programs to midwifery students needing to build on their medical skills, international experience or birth count. Spend your days immersed in clinic life as well as in medical outreaches and home healthcare.

OUR VISION

To train highly equipped and competent midwives with ample international midwifery experience before entering the mission field. We believe that midwives should enter the field being equipped to handle almost every situation thrown at them.

OUR MISSION

To provide local and indigenous families with compassionate and quality medical care at minimal to no cost. We believe that healthcare can be used as a way to show Christ's love to others and greatly impact their lives both in a physical and spiritual way.
