PAINT-GRADE WOOD**

SPINDLES- UPGRADE OPTIONS

Decorative, turned or stain-grade hardwood spindles available at additional cost.

Various designs and colours can be custom ordered and pricing may vary.

Knuckled spindles can be installed in various patterns such as 1:1, 2:1, 3:1 etc.

FEATURES

- Modern 2-2 ¼" square front design, no trim.
- Minimal nails used (if at all required) on treads with hidden fasteners and joinery.
- Unfinished hardwood installed on landings to be stain-matched to staircase.
- Protective covering installed upon job completion to allow use of staircase until staining is finished.

HOW WE BUILD THEM

- Assembled with heavy duty GRK screws securing treads into housed stringer.
- GRK screws also used to secure stair into studs during installation.
- PL (Premium Polyurethane Construction Adhesive) used on riser miters, squeak blocks and wedges for durability and to prevent creaking.
- Titebond 3 glue used for all laminations.
- 120 grit sanded finish.

BEHIND THE SCENES

TREAD CAPPING

- Custom treads made precisely to fit your stair.
- 2 ¾" fronts provide ample coverage of old tread return, no need for trim.
- Old stair reinforced with screws and PL adhesive to eliminate/reduce squeaking.
- Treads and risers scribed to stringer for a tight fit.

FINAL NOTE

We manufacture all of the products listed in this catalogue in house with premium solid woods.

It is important to note that, with any natural material, colouration and wood graining may vary from the images and from product to product.

All material is supplied/installed in raw form and staining services are not provided by Iron and Oak Inc.

More inspiration and photos from our completed work can be found on our website or Instagram page.
