# INDUSTRIAL: PROTECTING JOBS AND RAISING PAY

We will tackle the cost of living crisis by protecting jobs, raising pay and making work more secure. We will strengthen collective bargaining and organising.

We will not pay the price of Trump's wars with spiking energy bills and rising food prices. Our union's focus will be back where it should be, fighting with and for members.

When we are united we can stop site closures and cuts to services. We will answer the challenges of AI. We will answer the climate emergency while defending jobs and the future of our industries.

# POLITICAL: STOPPING THE FAR-RIGHT

We will defend our members from attack at work, online and on the streets. This is the most important issue of our times.

The far-right are attacking and dividing us. Our union must lead the fightback. Together we can stop the far-right in their tracks.

People are angry and are right to be. Our union must be the answer. We must be the force for change that confronts the corporate elites and all those who seek to divide us.

We will only support politicians who support us. We will rediscover our own voice which will be heard in all political arenas where decisions are made about us.

Members will have their say on the link between our union and the Labour Party.

# REUNITING OUR UNION: OUR MOVEMENT FOR CHANGE

We need a new start. It's time to end the toxic divisions which hold our union back.

It's time to end corruption and cronyism by restoring members' control over our union.

We will open the books. Our union must be transparent and accountable with members' money.

When we stand together the potential for our union knows no limits. We will be a powerful force for change, at work, internationally and politically.
