BMAI

The background image shows a city skyline with various skyscrapers under a cloudy sky. The foreground is a landscape that is split: the left side is a cracked, dry, brownish ground, while the right side is a lush, green field of grass, symbolizing the impact of climate change.

CLIMATE CHANGE

**The earth was not given to us by our parents,
it has been loaned to us by our children**

Climate Change and Global Warming is real and it threatens to unsettle economies and create disadvantages to people in most developing countries.

There are many concerns of opting for an alternate renewable source of Energy and Biodiesel is emerging as the forerunner to replace fossil fuel.

Major Green fuels for the transport sectors are becoming popular in many countries and the fastest growing is that of Biodiesel.

Biodiesel contributes to the environment; it secures a region's energy needs and provides the freedom to rural areas to access decentralized power.

As a Green Fuel it also enables the Transport and Industrial sectors to grow on Clean Development Mechanism.

Production and consumption of Biodiesel derived from various feedstock improves green cover, raises the water table, prevents soil erosion, prevents Global warming and most of all is renewable and hence stands out as the most preferred alternate fuel for sustainable growth.

It will be appreciated that fossil oil is fast running out. It is therefore necessary to find and support viable replacements that can reduce pollution levels and be truly sustainable.

A NEED FOR CHANGE

Climate change is real. It is happening right now, it is the most urgent threat facing our entire species and we need to work collectively together and stop procrastinating.

There is an urgent need to immediately cut down emissions caused by use of fossil fuels.

The transport sector is the highest contributor to Global Warming and Climate Change.

Use of Biodiesel as a partial or complete replacement to regular petro-diesel will assist in mitigating the threats owing to Climate Change.

Change is the need of the hour.

This climate change issue is at the core of BMAI's objective to ensure wide availability of Biodiesel in India.

The following advantages accrue with an immediate partial replacement of Biodiesel:

- Contribute to reduction of harmful pollutants caused by the transport and other fuel related sectors
- Reduce India's dependency on foreign fuel
- Save the Nation's precious foreign exchange
- Generate millions of employment opportunities
- Empower various communities
- Make India a self reliant country

ABOUT BMAI

Biodiesel Manufacturers Association of India (BMAI) is India's premier association formed to foster and assist in the growth of the Biodiesel and ancillary industries in India.

BMAI takes pride in being a values driven association - with a vision to ensure the growth of the industry in a fair and transparent manner whilst protecting the interests of its members.

BMAI members comprises and invites membership of persons from Oil Marketing Companies, Technocrats, Bureaucrats, Biodiesel Manufacturers, Aggregators, Raw Material Suppliers, Technology Providers, Farmers, Universities amongst others.

BMAI believes in holistic growth. We believe that an association plays a pivotal role in ensuring the growth of the industry.

BMAI works closely with its members and collects information from its members to formulate strategies to present to respective agencies to foster the growth of the industry.

We invite you to be a part of this journey and contribute to the upliftment of the Nation.

MISSION: To ensure sustainable growth of the Biodiesel Industry in India by involving stakeholders for a common objective

VISION: To be a key contributor for India to become energy independent by empowering stakeholders of the Biodiesel industry

OBJECTIVES OF BMAI

Main Objectives of BMAI

1. To promote, grow and protect the industry, trade, commerce, manufacturers, traders, dealers and other activities of the Biodiesel and related ancillary industries in India
2. To encourage, promote and grow the use of Biodiesel with an aim to publicise, propagate and advocate their uses through various publicity media including organising seminars/ conventions.
3. To represent and make known to its members information related to the Biodiesel industry as a whole before governmental and quasi-governmental authorities trade or industrial bodies, chambers of commerce, foreign trade and industrial interests, universities, schools, educational institutes and others.
4. To assist members in enhancing their capacities, technologies, developing alternate feedstock and making them competent for world markets.

The main purpose of the Association is to foster the development and growth of the Biodiesel industry in particular and overall development of Biodiesel industry in the country in order to increase Biodiesel availability in the country, to make the country self reliance in Biodiesel to meet the growing energy demands of the large population.

The background of the top section features a stylized globe of the Earth. Three large, semi-transparent green arrows are arranged in a circular pattern around the globe, pointing clockwise. A cluster of four green leaves is superimposed on the globe, centered over the Indian subcontinent.

ROLES OF BMAI

Main Roles of BMAI

BMAI is an all India premier association formed for the growth of the Biodiesel Industry in India.

BMAI and its office bearers shall take all steps to ensure the sustainability of the industry by making various representations conducive for the collective growth of its members to uplift the Nation.

Association shall assist its members in the following aspects, including but not limited to:

- Membership and related activities
- Setting up of Unit
- Upgradation of Unit
- Testing and Quality Control
- Feedstock Development
- Representation to Government agencies etc.
- Access to Expert Panel for anything related to Biodiesel
- National, Regional and State level committees

The background of the top section of the page features a close-up photograph of a person's hand, wearing a white sleeve, holding a green plant branch with several leaves. The hand is positioned on the right side, with fingers slightly spread. The plant branch extends from the left towards the center. The overall background is a soft, light green color.

ORGANIZATION STRUCTURE

Being a values driven association with focus on welfare of its members through growth of the Biodiesel industry, BMAI takes pride in employing a dynamic team of experienced and well networked professionals from the industry.

Our management team comprises of Advisors, Technocrats, Manufacturers, Retired Senior Officials amongst others. This helps us in ensuring that the industry and its members are protected.

Transparency and accountability within ourselves and in our operations makes us a trustworthy association having clear agenda for the industry.

We conduct various meetings, forums, conferences for our members for the welfare of the industry.

Our Organization Structure is as under:

- DIRECTOR GENERAL
- PRESIDENT
- VICE PRESIDENT
- SECRETARY
- TREASURER
- ADVISORS TO THE ASSOCIATION

INFORMATION DISSEMINATION

BMAI as a Data Centre for its Members

BMAI is formed with an objective to uplift its members. BMAI encourages use of its website as a data centre for the latest happenings in the Biodiesel industry in India and also across the globe.

It shall collect data and publish on its website notifications, circulars, policies, acts, rules, regulations, reports etc. w.r.t. the Biodiesel industry.

This information shall be freely available to all its members and visitors to the website of BMAI.

BMAI shall conduct various seminars, conferences, participate in exhibitions globally, publish articles, newsletters for the welfare of its members.

BMAI believes in holistic development and hence also invites information and data from members and visitors to ensure growth of the industry.

BIODIESEL
Journal

BMAI's BIODIESEL JOURNAL

BMAI publishes a quarterly journal titled the "BIODIESEL JOURNAL" for latest updates and news on the Biodiesel Industry in India and globally.

FORGING PARTNERSHIPS

Partnerships

BMAI believes in holistic development.

We partner with various institutions, organizations, associations, trade bodies, councils in India and internationally.

For fostering the growth of the Biodiesel Industry we shall associate and liaison with:

- Ministry of Petroleum and Natural Gas
- Ministry of New and Renewable Energy
- Ministry of Agriculture & Farmers Welfare
- Ministry of Road Transport and Highways
- Ministry of Ports, Shipping and Waterways
- Ministry of Science and Technology
- Council of Scientific And Industrial Research–Indian Institute Of Petroleum (CSIR–IIP)
- Food Safety and Standards Authority of India
- Solvent Extractors Association of India
- Chemexcil
- Indian Federation of Green Energy
- The Confederation of All India Traders..... amongst others

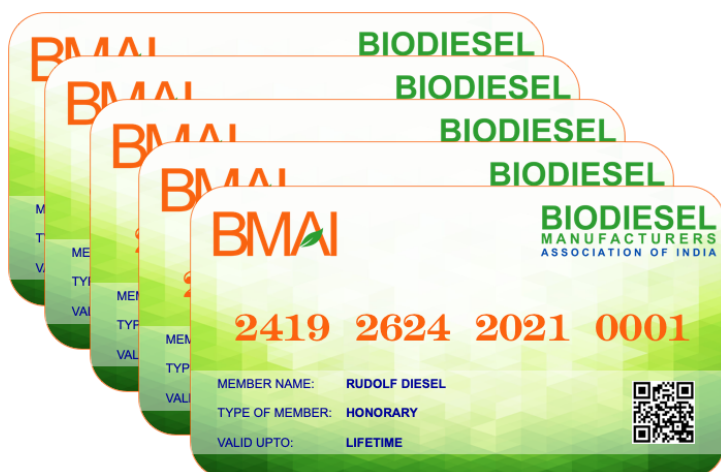

MEMBERS

Member Privileges

We invite you to become a member to BMAI - an all India premier association formed for the promotion, growth of the Biodiesel Industry in India.

Membership gives you access to information, data, events, expert opinions etc. in the Biodiesel Industry.

Become a member now and contribute to building the Nation!

Membership

To become a member, send us an email or kindly visit our website www.bmai.org.in
