

Mason Middle School

BOE Report

1/30/2026

- The Mason Middle School Student Council sponsored a hygiene drive this month. Students donated toothpaste, toothbrushes, shampoo, and other self-care items.
- We had a fun filled Winterfest spirit week. Students and staff participated in different themes each day including a flannel day and class colors day. The middle school ended Winterfest week with a spirit assembly on Friday, where various academic and athletic teams were recognized. Students also participated in a variety of events to win the spirit jug.
- The middle school is excited to be able to offer new electives for the 2nd semester. We have added a woodworking class for 8th graders, as well as a robotics class for our 6th and 7th graders.
- On Friday, February 13, middle school students will be attending our next PBIS field trip. Students will be heading to Monroe Sports Center to enjoy bowling and a pizza lunch!
- In February, we will be launching a new opportunity for middle school students to participate in a team-based STEM competition called: CEF You Be the Solution Challenge. This competition builds essential skills such as effective communication, critical thinking, and problem solving.
- Additionally, groups of 6th through 8th graders will be attending “Introduce a Middle Schooler to Engineering” at the University of Toledo. We will have a group attending on February 27 and another group attending on March 20. This opportunity will allow students to discover new interests in engineering and to understand engineering better through hands-on experiences.
