Courtney Hammond- Operations Director

Administrative report

June 18th, 2025

- The installation of new screens on all high school windows has been completed. This enhancement improves overall safety and helps prevent the entry of animals and debris from outside.
- In collaboration with GLIC Electrical, we completed the wiring and installation of a new GFI outlet in the pool mechanical room to support the operation of the new chemical feeder.
- Work was also completed on the fire suppression system in the high school kitchen. Due to the outdated and unsupported condition of the previous system, a new system was installed. This project was completed in partnership with GLIC Electrical and Summit Fire Protection.
