Mason Consolidated Schools Awarded \$3.6 Million State Infrastructure Grant

Mason Consolidated Schools is proud to announce that it has been awarded \$3.6 million through the Michigan Department of Education's Section 12e School Infrastructure Grant to address critical roofing needs.

As one of only 31 school districts across the State of Michigan selected to receive this highly competitive grant, Mason Consolidated Schools is honored to receive this significant investment in our facilities. The funding will allow the District to preserve one of its most important community assets while ensuring a safe and secure learning environment for students and staff.

"This grant represents a tremendous opportunity for our district," said Superintendent Kelli Tuller. "Addressing the roofing needs at Mason with state funding allows us to continue preserving our facilities while focusing our local planning efforts on other critical infrastructure needs throughout the district. We are incredibly grateful to the State of Michigan for recognizing the importance of investing in our schools."

The District extends its sincere appreciation to the administrative team whose collaborative efforts resulted in a successful application for this competitive funding opportunity.

The Section 12e award is an investment not only in our buildings, but in the future of our students, staff, and the entire Mason Consolidated Schools community. The District remains committed to responsibly maintaining its facilities while pursuing additional funding opportunities to support long-term infrastructure improvements.
